AISIN
Geared up for the future

PIÈCES DE SERVICE

Articles disponibles dans ce catalogue (voir liste d'application)

WP

Water pump

AISIN manufactures water pump for the aftermarket to protect engines from severe heat.

Engine specific water pressure is achieved without excessive load to engine.

Aisin's aluminium die-casting technology allows for size and weight reduction.

Improved strength in body design and carbon ceramic mechanical seals assures leak prevention.

FC

Fan Clutch

Engineered to exacting OE specifications, AISIN Fan Clutch quickly adjusts to temperature changes to provide efficient, controlled cooling. Providing optimal cooling performance without sacrificing engine efficiency.

FN

Plastic Fan Blade

Function: Cooling of radiator

Ensures sufficient airflow to radiator in case of engine high temperature, low speed driving or engine running at stop.

Reduces air pressure between fan and radiator by fan rotation.

Strengthen the cooling function of the radiator.

TK

Timing Belt Kit

The kit includes : water pump, belt, tensioner, idler(s).

For the sake of engine's lifecycle reliability, it makes sense to replace the timing parts while replacing the water pump as life cycle of the pump and timing pieces is the same.

TIMING BELT KITS can save you time and money

Your service technician will tell you that replacing your timing belt is critical to your engine's life. If it fails, severe engine damage such as bent valves can occur.

This is also true with the water pump, which is the heart of the cooling system. If the water pump fails, it can also cause severe engine damage, leading to a blown head gasket, or in the worst case, the whole engine may need replacement.

Did you know that the replacement of a typical timing belt is almost, bolt-for-bolt and nut-for-nut, the same process as for a water pump?

A typical timing belt replacement will include the timing belt and bearings. Since the life expectancies of these bearings (idler and tensioner) are about the same as the bearing inside your water pump, it just makes sense to replace these two critical engine parts at the same time, saving you time, money and giving you peace of mind.

Example Standard Labor Rate Comparisons

Vehicle Information				* Approximate Labor Time (Hours)				
Year	Make	Model	Engine	Timing Belt	Water Pump	Total	Complete Timing Kit	Hours Saved
2001.9	Toyota	RAV 4	1CD-FTV	2.7	3.9	6.6	3.9	2.7
2005.7	Toyota	AYGO	2WZTV	5.9	6.2	12.1	6.2	5.9

* Time estimates per labor guides

- AISIN is the largest original equipment water pump manufacturer in the world.
- AISIN water pumps are original equipment on many European and Japanese vehicles.

OUTLINE

Company name	AISIN SEIKI CO. LTD.	
Established	June 1949	
Capital	45 billion ¥ (as of March 31, 2013)	
Total sales	2529,9 billion ¥ (consolidated – Year's ended March 31, 2013)	
Employees	83378	
Land area	10.217.000 m ²	
Floor space	803.000 m ²	
AISIN Group	170 companies in 20 countries	
AISIN Group Plants	Japan	11
	North America	18
	Central & South America	4
	Europe	5

Brand protection

"No Counterfeit parts"

Aisin has been actively involved in preventing the manufacturing and sale of counterfeit products. In addition to our own efforts, AISIN is also participating with the "NO Counterfeit Parts" movement in conjunction with the Japan Auto Parts Industries Association (JAPIA). Our goal is to eliminate counterfeit parts through individual and organized group efforts. If you have any information on the sale or production of counterfeit items, please contact your local representatives immediately or you may send us information directly using the Counterfeit Report Form.

Protection de la marque

La société AISIN est activement impliquée dans la prévention en matière de fabrication et de vente de pièces de contrefaçon. Conjointement avec la Japan Auto Parts Industries Association (JAPIA), AISIN participe au mouvement « NON aux pièces contrefaites ». Notre but est la suppression des pièces de contrefaçon au travers d'initiatives individuelles ou collectives. Si vous avez des informations sur la vente ou production de pièces de contrefaçon, veuillez contacter votre contact commercial ou par email am@be.aisin-europe.com.

"Don't produce! Don't Sell! Don't Buy!"

Japan Auto Parts Industries Association (JAPIA) is providing a series of posters as part of the "No Counterfeit Parts" movement. To provide international awareness of illegal activities, posters are available in several key languages: English, French, Spanish, Chinese, and Arabic. Please contact your local sales representatives to receive posters and additional information. You may also apply directly using the Request Form.

« Ne produisez pas ! Ne vendez pas ! N'achetez pas ! »

Dans le cadre de la campagne « NON aux pièces contrefaites », la Japan Auto Parts Industries Association (JAPIA) met à votre disposition une série de posters. Afin sensibiliser l'opinion internationale aux activités illégales, les posters sont disponibles en anglais, français, espagnol, chinois et arabe. Pour recevoir des posters, veuillez contacter votre contact commercial ou utilisez l'adresse email am@be.aisin-europe.com.

IMPORTANT NOTICE

The purpose of this publication is to furnish our customers with as complete a listing of their new cooling parts requirements as possible.

All listings, applications or interchanges contained in this publication are based on the latest information available at the time of printing. Every effort has been made to ensure that the information contained in this publication is correct, but we do not assume any responsibility for errors which may occur. AISIN has an intensive programme of design and development which may well alter product specifications.

Cross references of car or part manufacturers are given for comparison purpose only. The use of such information on invoices is not allowed. All rights reserved. Reproduction or use of this publication -even in part- for the purpose of creating a catalogue is not allowed.

REMARQUE IMPORTANTE

Le but de cette publication est de fournir à nos clients une liste aussi complète que possible des nouvelles pièces liées au système de refroidissement.

Toutes les informations reprises dans ce catalogue sont transmises sur base des données disponibles au moment de l'impression. Il a été apporté une attention particulière pour garantir l'exactitude des renseignements contenu dans cette publication. AISIN décline toute responsabilité légale à cet égard. AISIN poursuit un programme de conception et de développement qui peut entraîner la modification des spécificités des produits.

Les tableaux de correspondance des constructeurs de pièces détachées et constructeurs d'automobiles sont communiqués uniquement pour permettre des comparaisons. Tous droits réservés. Toute reproduction, même partielle, de cette publication sous quelle que forme que ce soit est interdite.

Water pump Diagnostic Manual

GASKET INSTALLATION 244

246 **1. For your safety**

2. Possible cause of issues 247

248 **3. Examples of water pump failure**

4. Read before water pump installation 249

Gasket installation

Use only the gaskets and O-rings supplied with the water pump. Combined usage of the liquid gaskets and supplied gaskets (or O-rings) could result in water leakage or other serious problems.

Possible issue 1: Liquid gasket is used instead of the supplied gasket

Possible issue 2: Liquid gasket is used instead of the supplied O-ring

If liquid gasket is used with supplied gaskets or O-rings

The debris of the liquid gasket enters inside

The debris of the liquid gasket enters inside the mechanical seal

Dirt accumulates on the surface of mechanical seal and it wears down

This results in coolant leakage

The surface of a worn down mechanical seal due to the liquid gasket debris.

How to apply the liquid gasket

Where to apply the liquid gasket on the mating surface of the engine

For Toyota vehicles

Good example

Poor example

Good example

Cross Section view of mating surface of the engine

The position where the liquid gasket is applied

By applying the liquid gasket onto the outside of the seal groove, the mating surface gets sealed as shown below.

When installing the engine

✗ Poor example

Cross Section view of mating surface of the engine

The position where the liquid gasket is applied

By applying the liquid gasket directly onto the seal groove, the liquid gasket gets pushed out from the mating surface into the interior of the pump, resulting in debris that would cause water leakage.

When installing the engine

For Nissan vehicles

Cross-section view of the mating surface of the engine

The position where the liquid gasket is applied

By applying the liquid gasket onto the seal groove, a small notch on the mating surface holds excess gasket and it gets sealed as shown below.

When installing the engine

1 For your safety

1

Thoroughly flush the cooling system (radiator) 2-3 times to remove the stains and rust with the engine running and the original water pump still in place.

Why? To prevent water leakage caused by foreign materials caught in the mechanical seal.

2

Before installation, remove the old gasket and other foreign materials with white gasoline or another solvent. Then, remove all oil and grease from the mating surface.

Why? To prevent water leakage from the mating surface.

3

If the pump requires the liquid gasket, apply it evenly on the seal. If gaskets are supplied with the pump, use the supplied gaskets only. *Do not use the liquid gasket and supplied gasket together.

Why? If the liquid gasket gets into the water chamber, it will get caught in the mechanical seal, causing water leakage.

*Please refer to page 2 for details on how to apply liquid gasket.

4

Fasten bolts with the torque specified by the car manufacturer to evenly tighten all corners.

Why? To prevent water leakage from the mating surface.

5

When installing other parts such as a pulley or fan coupling, make sure to prevent failures caused by foreign materials that get caught. For vehicles with a fan coupling, make sure there is no rust or looseness, and then use a dial gauge to check the run-out accuracy after installation.

Why? To prevent foreign materials from getting caught which leads to eccentricity (excess vibration) and looseness on the pulley and fan coupling. This may cause the parts to fall off or get damaged.

6

Adjust the belt tension to the tension specified by the car manufacturer.

Why? To prevent damage to the shaft parts (body and bearing) that might be caused by excess tension on the belt.

7

When changing the pump, fill the new LLC to the specified amount and density.

Why? If the pump spins without having enough LLC, the mechanical seal gets worn down, causing water leakage and abnormal noise.

8

Make sure to thoroughly remove all the air before filling the radiator and reservoir tank to the specified amount.

Why? If the pump spins without having enough LLC, the mechanical seal gets worn down, causing water leakage and abnormal noise.

9

After checking the LLC level and belt tension again, start the engine.

Warning

•For your safety, please follow the directions. Inaccurate installation may lead to injury or breakdowns.

•The water pump is a consumable part, and if it breaks down it can disable operation. It is recommended to change the pump on a regular basis such as when getting your car major-serviced, changing the timing belt, and etc.

2 Possible causes of issues

Symptoms of water pump failure **water leakage**

Location	Symptom	Primary cause
Drainage opening	The mechanical seal has foreign materials caught in it.	<ul style="list-style-type: none"> • The coolant is inferior in quantity or quality. • The liquid gasket is sticking into the water chamber.
	The mechanical seal surface is worn out.	<ul style="list-style-type: none"> • The coolant is inferior in quantity or quality. • The inside of the radiator was not cleaned properly.
	The mechanical seal is burned.	<ul style="list-style-type: none"> • The engine was running without any coolant.
Mating surface	Foreign materials are caught inside.	<ul style="list-style-type: none"> • There are still foreign materials remaining on the mating surface of the engine.
	There is a problem with the installation.	<ul style="list-style-type: none"> • The liquid gasket was applied unevenly. • The liquid gasket was used together with a supplied gasket (paper, O-ring). • The bolts were not tightened properly. • The mating surface of the body has scratches or an irregular shape.
	The gasket is damaged or irregularly shaped.	<ul style="list-style-type: none"> • The gasket was cut or damaged during shipping or handling. • The bolts were unevenly tightened.

Symptoms of water pump failure **Abnormal noise**

Location	Symptom	Primary cause
Bearing	Rumbling noises Locking	<ul style="list-style-type: none"> • Excess belt tension has caused bearing damage. • The pulley and fan coupling were not installed correctly, which has caused bearing damage.
Mechanical seal	Whining noises	<ul style="list-style-type: none"> • Carbon buildup has accumulated on the ceramic surface of the mechanical seal. • The engine was running without any coolant.

Symptoms of water pump failure **Others**

Location	Symptom	Primary cause
Impeller Corrosion	Rust or corrosion on the fan blades (cavitation)	<ul style="list-style-type: none"> • The coolant is inferior in quantity or quality which has caused corrosion. • The inside of the radiator was not cleaned properly.

3 Examples of water pump failure

Water leakage - Coolant is leaking from the drainage opening

Situation there are traces of coolant leakage from the drainage opening.

However, if the traces of leakage are wet, or the coolant in the reservoir tank is clearly lower after a month, it is possible that there is water leakage.

Cause

Dirt, particles, or sludge, etc. in the coolant get caught in the sliding surface of the mechanical seal, which wears the sliding surface down, reducing the effectiveness of the seal and causing water leakage.

Preventative countermeasures

Cleaning

Thoroughly flush the cooling system 2-3 times to remove the stains and rust with the engine running and the original water pump still in place.

Coolant

Replace the LLC on a regular basis to the amount and density specified by the manufacturer.

Usage of liquid gasket

Do not use the liquid gasket if the gaskets are supplied with the pump. When using liquid gasket, apply evenly so that any excess does not stick out into the water chamber.

Comparison of a drain leakage for conforming/non-conforming samples.

Conforming sample

There are traces of leakage, but because it is only temporary, the marks are dried out.

Non-conforming sample

The traces of leakage are large, the marks are constantly wet or dripping.

Examples of issues that occur when the fan coupling or some other parts are not installed properly.

Situation

- The water pump body is damaged
- The water pump bearing section is damaged

Cause

- The fan coupling was improperly installed (large eccentricity).
If foreign materials get inside when attaching the pulley sheet and pulley, excessive force is applied to the shaft due to eccentricity. As a result, bearing and body are damaged.

Preventative countermeasures

- Please reattach them after removing all foreign materials and dirt on the surface of pulley sheet and pulley.
- When replacing the water pump, it is also recommended to replace the fan coupling with a new one.

Damaged bearing

Damaged body

4 Read before water pump installation

If you purposely spin the pulley sheet before installation while the mechanical seal is dry, the carbon part of the mechanical seal (soft while it is new) will scrape the surface of the ceramic, causing the carbon on both surfaces to create carbon build-up. This may result in making abnormal whining noises.

1. Do not spin while it is dry.

2. Mechanical seal part breakdown

Carbon section

Ceramic section

If you repeatedly spin while it is dry, carbon will stick to the ceramic part and potentially make abnormal noises.

WARRANTY

Aisin Seiki Co., Ltd. (Aisin) warrants Aisin products (Products) to be free from defects in material and workmanship for a period of ninety (90) days, from the date of purchase thereof and installation thereof on the consumer's vehicle, or six thousand (6000) Km, whichever occurs first, provided that in no events, Aisin warrants Products when not installed and used in strict conformity with specifications described in the most up to date Aisin catalog for such installation and operation, and Products which have been altered, improperly installed, maintained or repaired, or damaged by accident, negligence or misuse.

This limited warranty is expressly in lieu of all other warranties, expressed or implied, and all other obligations or liabilities on Products.

This limited warranty excludes all labor charges or other incidental or consequential damages.

Any Products for warranty claim hereunder must be returned through the importer, agent, or the distributor from whom they were purchased, provided that such Products must be accompanied by an explanation of circumstances and conditions under which they failed. Aisin reserves the right to examine all Products returned to it for warranty claim to determine whether or not any such Products have failed because of a defect in material or workmanship. The obligation hereunder shall be limited to, at its option, repairing, replacing or crediting for the purchase price of Products, which proves to be defective during the warranty period.

Regardless of whether any Products are repaired, replaced or credited for the purchase price of Products hereunder, transportation charges on the return of such Products must be prepaid by the customer under this limited warranty.

AISIN SEIKI CO., LTD

For any warranty claim, please contact our Quality Department and ask a warranty demand form.
Tel: 00 32 2 387 01 36 - Email: quality@be.aisin-europe.com - Fax: 00 32 2 387 06 33
Only the warranties with a W.Nr will be analysed.

GARANTIE

Aisin Seiki Co. Ltd garantit ses produits libres de tout défaut technique et d'élaboration pour une période de (90) nonante jours à partir de la date d'achat du dit produit, c'est-à-dire de l'installation sur le véhicule du client ou 6000 km, première limite atteinte. En aucun cas Aisin ne garantit ses produits lorsqu'ils ne sont pas installés et/ou utilisés de la façon prescrite par les derniers catalogues publiés en date. De même, la garantie ne s'applique pas pour les produits endommagés, mal installés, non correctement entretenus ou endommagés par accident, négligence ou utilisation impropre.

La garantie limitée prévaut sur toute autre garantie et toute autre obligation ou responsabilité sur les produits.

La garantie limitée exclut les frais de main d'œuvre ou tout autre frais consécutif aux dommages provoqués.

Tout produit sujet à garantie doit être retourné via l'importateur, l'agent ou le distributeur chez qui il a été acheté, le produit devant être accompagné par un rapport expliquant les circonstances du défaut advenu. Aisin se réserve le droit d'examiner les produits qui lui sont renvoyés afin de déterminer s'il s'agit d'un problème lié à un défaut du produit ou de son élaboration. L'obligation liée à la garantie limitée sera de remplacer ou de créditer pour l'équivalent de la valeur d'achat du produit pour lequel est prouvée une défectuosité lors de sa période de garantie.

Quelle que soit la décision prise concernant la garantie, les frais de transport pour l'envoi du produit auprès du fournisseur sont à la charge du client.

AISIN SEIKI CO. LTD.

Pour toute demande en garantie, prière de contacter notre Département Qualité pour un formulaire de retour en garantie.

Tél : 0032 2 387 01 36 - Fax : 0032 2 387 06 33 - Email : quality@be.aisin-europe.com

Ne seront analysés que les retours en garantie porteurs d'un numéro de référence.
