ATE Ceramic Bremsbeläge

ATE Ceramic brake pads

Die staubarme Arbeitsweise der ATE Ceramic Bremsbeläge verleiht wertvollen Alu-Felgen eine lang anhaltende attraktive Optik.
The low-dust operation of the ATE Ceramic brake pads ensures that valuable aluminum rims retain an attractive appearance for longer.

Innovative Bremsbelagmischung

ATE Ceramic lautet die Lösung von Continental für staubarmes, geräuschreduziertes, materialschonendes und umweltfreundliches Bremsen. Das Geheimnis der Bremsbeläge liegt in einer innovativen Bremsbelagmischung. Sie erzeugt beim Bremsen einen so genannten Transferfilm auf der Bremsscheibe. Dieser schützt die Bremsscheibe vor übermäßigem Abrieb. Das Ergebnis: weniger Bremsstaub, mehr Komfort, weniger Verschleiß.

Innovative brake pad compound

ATE Ceramic is Continental's solution for low dust, low noise, resource-saving and environmentally friendly braking. The secret of the new brake pads lies in an innovative brake pad compound. During braking it produces a "transfer film" on the brake disk which protects the brake disk from excessive wear. The result: less brake dust, more comfort, less wear.

Staubarm – geräuscharm – langlebig

Low dust – low noise – long-life

Ceramic macht den Unterschied – nicht nur bei der Felgenoptik.
Ceramic makes the difference – and not just to the look of the rims.

Weniger Verschleiß, geringere Kosten

Umfangreiche Vergleichstests unter harten Alltagsbedingungen haben gezeigt, dass ATE Ceramic Bremsbeläge im Vergleich zu Standard-Bremsbelägen deutlich weniger verschleßen. Sie verlängern auch wesentlich die Lebensdauer der Bremsscheiben. Der geringere Abrieb senkt die Reparaturkosten und schont den Geldbeutel des Autofahrers.

Less wear, lower costs

Extensive comparative tests under tough everyday operating conditions have shown that ATE Ceramic brake pads wear significantly less than standard brake pads. They also significantly extend the service life of the brake discs. This reduction in wear reduces repair costs and saves drivers' money.

Die Vorzüge der Belag-Technologie auf einen Blick:

- Staubarm
- Geräuschreduziert
- Langlebig

ATE Ceramic Bremsbeläge basieren auf einer neuen Bremsbelagmischung, die gegenüber herkömmlichen Mischungen fast keinen Abrieb mehr erzeugen.

Felgen behalten damit ihren Glanz, und die Lebensdauer der Bremsscheiben verlängert sich nachhaltig.

Mit ATE Ceramic Bremsbelägen wird das Bremsen zudem deutlich leiser.

ATE Ceramic Bremsbeläge sind für zahlreiche Modelle unterschiedlicher Hersteller verfügbar. Das Programm wird ständig erweitert.

The benefits of the pad technology at a glance:

- Low dust
- Low noise
- Long life

ATE Ceramic brake pads are based on a new brake pad compound which, compared to conventional compounds, produces almost no wear debris.

This ensures that rims stay shiny, and the service life of the brake discs is sustainably extended.

With ATE Ceramic brake pads, braking is also much quieter.

ATE Ceramic brake pads are available for numerous vehicle models from various manufacturers. The product range is being continuously expanded.

Der mobile Bremsflüssigkeitstester mit Drucker

ATE BFT 320P in Kürze:

Der ATE BFT 320P ermöglicht durch direktes und laborgenaues Messen der Siedetemperatur eine sichere Aussage über den Zustand der Bremsflüssigkeit. Bei diesem Vorgang wird die Bremsflüssigkeit durch Aufkochen bis zum Siedepunkt erhitzt. Die dabei ermittelte Temperatur wird in Grad Celsius angezeigt. Zusätzlich zu dieser Messung ist es ratsam, die Bremsflüssigkeit einer Sichtkontrolle zu unterziehen. Bei zu hohem Verschmutzungsgrad muss sie ebenfalls gewechselt werden.

The mobile brake fluid tester and printer

ATE BFT 320P in brief:

The ATE BFT 320P measures the boiling temperature of brake fluid directly and with laboratory precision, providing an accurate assessment of its state. In this process, the brake fluid is heated up to boiling point. The boiling point temperature that has been found is displayed in degrees Celsius. Besides measuring the temperature, you are also advised to check the brake fluid visually. If it is too dirty, it must also be changed.

Feldübergreifende Sicherheit

Safety across the board

Qualität benötigt professionellen Schutz

ATE setzt auf Produktverpackungen bereits seit Jahren erfolgreich ein zweistufiges Sicherheitsetikett ein, das eine eindeutige Identifizierung von Original ATE Produkten ermöglicht.

Die erste Stufe des Sicherheitsetiketts stellt der tesa Priospot® dar. Die Holografie-Technik mit verschiedenen Prüf- und Sicherheitsmechanismen ist nicht zu fälschen und schützt somit sogar das Etikett selbst vor Nachahmern. Mit dem tesa Priospot® wurden die Merkmale des tesa Holospot® – der weiterhin im Markt verfügbar ist und nach wie vor höchste Sicherheit bietet – noch weiter entwickelt.

Quality requires professional protection

ATE has for years been affixing a two-stage safety label on its product packaging with great success as it permits a clear identification of original ATE products.

The first stage of the safety label is the tesa Priospot®. This holographic technology with a variety of checking and security mechanisms is forgery-proof and protects even the label itself from imitations. With the tesa Priospot®, the features of the tesa Holospot® – still available on the market and still providing the highest level of security – were further enhanced.

Produkt- und Markenschutz

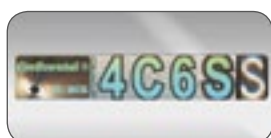

Product and trademark protection

Die zweite Stufe ist ein DataMatrix Code, genannt MAPP Code. Die vier letzten Ziffern dieses MAPP Codes werden immer auch im Holo- bzw. Priospot dargestellt – für ein Höchstmaß an Sicherheit. Der Code kann per Scanner oder durch manuelle Eingabe auf der ATE Website überprüft werden und zeigt sofort an, ob es sich bei dem Produkt um ein Originalteil handelt. Außerdem ist die Abfrage per Mobiltelefon in Verbindung mit entsprechender Software wie der ATE App möglich.

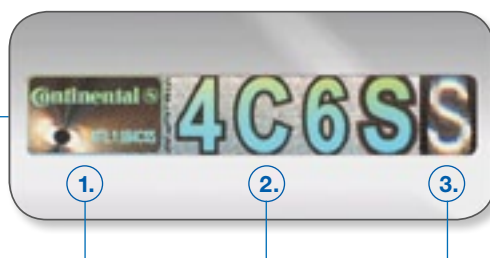

The second stage is a DataMatrix code, called the MAPP code. The last four characters of this MAPP code are always imaged in the Holospot/Priospot – for maximum security. The code can be checked by scanner or by manual entry at the ATE Website and indicates immediately whether the product is an original part. An inquiry can also be made by a mobile phone in conjunction with suitable software such as the ATE app.
