PROCEDURA DI SOSTITUZIONE DEVIOGUIDASGANCIO SU VEICOLI EQUIPAGGIATI CON IMPIANTO AIR BAG

L'impianto di sicurezza Air Bag è soggetto a severe normative riguardanti gli esplosivi, per questo motivo occorre rispettare la seguente procedura:

1) Innanzitutto occorre assicurarsi che le ruote del veicolo siano dritte. Scollegare prima il cavo Negativo e poi quello Positivo della batteria ed attendere almeno 5 minuti (questo permette l'azzeramento della memoria del computer di bordo).

2) A questo punto staccare progressivamente:

- * il modulo Air Bag - da riporre in ambiente protetto ed in posizione "faccia in su"
- * il volante; le protezioni in plastica; le connessioni elettriche
- * il Devioguidasgancio

3) Sostituire il Devioguidasgancio, prestare particolare attenzione a non pizzicare i cavi.

4) Estrarre la spina di sicurezza (in genere di colore rosso) dal cavo spiralato.

5) Ricollegare le varie connessioni elettriche, il volante, le protezioni plastiche ed il modulo Air Bag.

6) Ricollegare la batteria, prima il cavo Positivo ed in seguito il cavo Negativo.

In caso di malfunzionamento la spia Air Bag su cruscotto potrebbe rimanere accesa. Si rende necessario in questo caso collegare un'unità diagnostica per identificare il problema.

HOW TO CHANGE A STEERING COLUMN SWITCH IF THE CAR IS EQUIPPED WITH AN AIR BAG

The Air Bag systems are subjected to different legislation for explosives, dependant upon the country's current law, for this reason the following safety rules must be respected:

1) First make sure that the wheels of the car are centered. Disconnect the negative cable and then the positive cable from the battery and wait for at least 5 minutes (this permits to the on board computer memory to reset itself).

2) Now remove progressively:

- * the Air Bag and store it faced up in a safe place
- * the steering wheel, the plastic covers and the wires
- * the Steering Column Switch

3) Replace the steering column switch; be careful not to “pinch” the wires of the steering column switch itself and the ones of the clock spring.

4) Disconnect the security plug of the clock spring.

5) Once you have reconnected the steering column switch and the wheel you can reinstall the plastic covers and the airbag.

6) Now reconnect the battery – first the positive cable and then the negative one.

In case of incorrect working the Air Bag control light goes on. It is then necessary to identify the problem and reset the unit by using a specific instrument.

COMME REMPLACER UN COMMODO SUR VEHICULES AVEC AIR BAG

Les systèmes d'Air Bag sont soumis à la législation concernant les explosifs, classé selon les lois en vigueur dans chaque pays. Les consignes de sécurité suivantes doivent être suivies:

1) Tout d'abord il faut s'assurer que les roues soient droites. Débrancher la batterie (avant le câble négatif et puis le positif) et attendre 5 minutes l'effacement de la mémoire du calculateur de bord avant le démontage du module Air Bag.

2) Débrancher:

- * le module Air Bag - manipuler le module avec précaution et placer le module en position "face dessus"
- * le volant; le couvercle en plastic; les connecteurs électriques
- * le Commodo

3) Remplacer le Commodo, faire attention de ne pas pincer les câbles.

4) Séparer la fiche de sécurité (souvent en teinte rouge) sur le connexion à spiral.

5) Rattacher les connecteurs électriques, le volant, le couvercle en plastic, et le module Air Bag.

6) Rattacher le batterie - avant le câble positif et puis le négatif.

En cas de malfonctionnement le voyant du Air Bag peut rester allumé; dans ce cas il est nécessaire de se connecter à l'unité de diagnostic afin de cerner le problème.

ERSATZ EINES LENKSTOCKSCHALTERS BEI FAHRZEUGEN, DIE MIT AIRBAG AUSGESTATTET SIND

Die Sicherheitseinrichtung Airbag ist Gegenstand strenger Explosions-Vorschriften, daher ist das folgende Verfahren zu beachten:

1) Als Erstes muss man sicherstellen, dass die Räder des Fahrzeuges gerade ausgerichtet sind.
Trennen Sie zuerst das Masse-Kabel (-), danach das Batterie-Kabel (+) und warten Sie dann mindestens 5 Minuten ab (damit sich der Speicher des Boardcomputers zurücksetzt).

2) Im Anschluss lösen Sie schrittweise:

* das Airbag-Modul - legen Sie es in einer geschuetzten Umgebung in der Position "Oberflaeche nach oben" ab

* das Lenkrad; die Plastik-Abdeckungen; die elektrischen Verbindungen

* den Lenkstockschalter

3) Den Lenkstockschalter ersetzen, dabei besonders darauf achten, dass keine Kabel beschädigt werden.

4) Den Sicherheitsstecker (in der Regel rot) vom Spiralkabel herausziehen.

5) Die verschiedenen elektrischen Anschuesse wieder herstellen, das Lenkrad, die Plastikabdeckungen und das Air-Bag-Modul wieder zusammenbauen.

6) Die Batterie wieder anschließen, dabei zuerst das Batterie-Kabel (+) und im Anschluß das Masse-Kabel (-) verbinden.

Im Falle einer Fehlfunktion könnte die Airbag-Anzeige im Armaturenbrett dauerhaft leuchten. In diesem Fall ist es notwendig, eine Diagnose-Einheit anzuschließen, um die Fehlerursache festzustellen.
