WARNING / CAUTION

WARNING

- Automotive belts are for use in cars only.
- Be sure that operators have no loose articles of clothing, or loose hair, as there is a danger that they may be pulled into the rotating part of the pulley belt.
- When proceeding with repair, check or exchange of a belt, be sure that the belt is stopped after switching it off.
- Be sure that no one switches on the machine in the middle of repair, check and exchange of a belt.

CAUTION

- When replacing a belt or pulley, use one with the same specifications as the original one.
- Do not attempt to cut part of a belt with a knife or a scissors when tension is applied to the belt. It may cause the belt to bounce and hurt someone nearby.
- Align a belt along the center of the pulley. Otherwise, the surface of the belt will wear unevenly, causing reduced durability.

GOOD

BAD

BAD

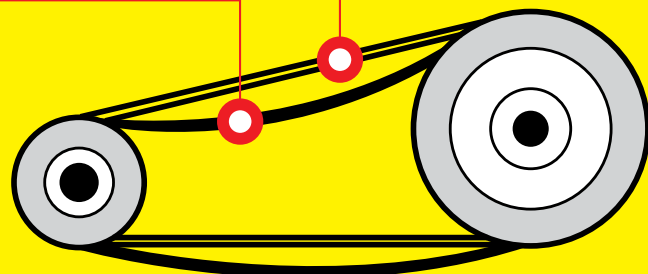

CAUTION

- Do not touch a belt or pulley immediately after operation. It is hot and you may get burned.
- Any attempt to change a belt should be made with no tension applied to the belt otherwise belt life may be reduced.
- Always maintain specified tension applied to a belt or noise or damage may result.
- In case more than one belt is used with a pulley, be sure to exchange all belts at the same time. Otherwise, the belts may have reduced durability.
