

**KYB**

KYB AUTO PARTS CATALOG

# High-Performance Shock Absorbers

**2013**

## How to Read the Catalog

### ■ Searching for New SR Special for Toyota Vitz

- 1) Check the model and year of the car for which you want to search.
- 2) Check the grade (grade, engine type, body style (sedan, wagon, etc.) and number of doors, etc.) and number of doors, etc. See below for the meanings of the numbers that are followed by parentheses ( ) in regard to the grade.
- 3) Check the column of the desired shock absorber, and search for the part number.

### Model Number Chart by Car Type

As for special features (i.e. lower ride height), if no relevant comment is provided, no such feature is provided.

MODEL/YEAR	Grade	Front Rear	NEW SR Special	Lower Sports/ Extage/ Real Sports Damper
------------	-------	---------------	-------------------	--

#### ■ VITZ

NCP10 99/1~	2 (CLA, U), 4 (2NZFE (1.3L)), 7 (3Door, 5Door), 11 (FF)	F	NST5206R.L	WST5206R.L
		R	NSF2051	WSF2051
NCP10 00/6~	2 (RS), 4 (2NZFE (1.3L)), 7 (3Door, 5Door), 11 (FF)	F	NST5206R.L	WST5206R.L
		R	NSF2051	WSF2051

#### ● Mention of Electronically Controlled Shock Absorber

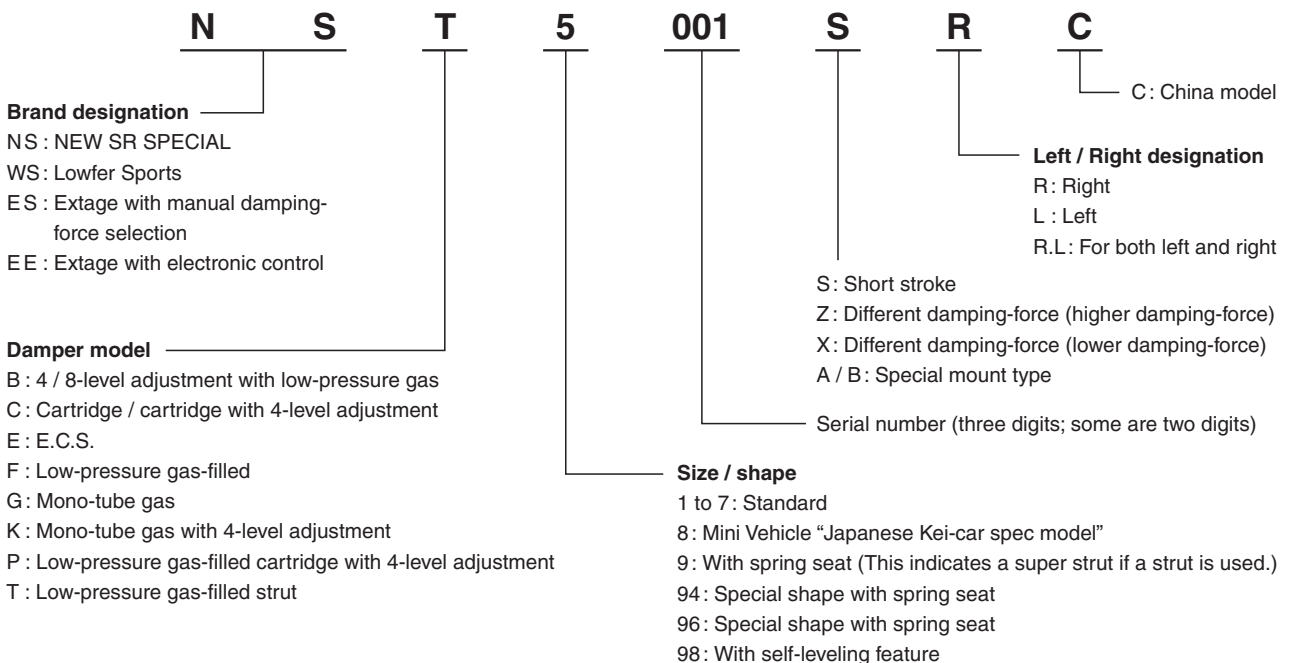

If the shock absorber has a special electronic control feature, it will be mentioned in the "Model" column. Please note that, if there is no mention of it in the column, the electronically controlled shock absorber is not used in the car.

1 (name), 2 (grade), 3 (engine type), 4 (engine model), 5 (exterior design), 6 (body style), 7 (door), 8 (passenger capacity), 9 (cargo capacity), 10 (tire), 11 (drive), 12 (note)

\* For Vitz, it will be as follows: Grade (Classic), engine model (2NZFE), number of doors (3-door/5-door).

**\* Before replacing a cartridge, confirm whether the strut can be disassembled from the car in which it is installed. Please note that the cartridge cannot be installed in a car containing a strut that cannot be disassembled.**

### Outline of Model Number System

# Lineage of Fine Craftsmanship KYB High-Performance Shock Absorber Series for today's car enthusiast.

## Quality and Performance Backed by Tradition

As a global supplier, KYB not only develops technologies for high-performance shock absorbers but is also closely involved in the production and development of integrated vehicle control systems and suspension modules. KYB products are employed by a wide range of top manufacturers of luxury cars in Europe and are highly recognized by other manufacturers throughout the world.

## R&D System Designed to Meet Future Needs

We have invested approximately three billion yen in KYB first proving ground, which is constructed near the Gifu plant "located in a central region of Japan".

We build a one-kilometer test course and a variety of other courses on a vast site of 600,000 square meters.

We are able to use our own facilities to determine specifications, evaluate performance and perform tests for our high-performance suspension products designed for the car enthusiast.

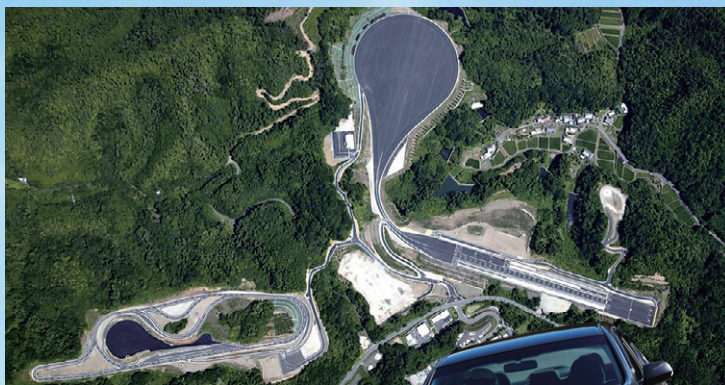

This will allow us to significantly enhance our evaluation capabilities and thereby offer better products with shorter development periods.

## Providing KYB Pride – High-Performance Shock Absorbers for the Car Enthusiast – to Customers Around the World

KYB is a global supplier of shock absorbers today. In fact, our shock absorbers are used in three out of five vehicles manufactured in Japan and in one out of about five vehicles manufactured around the world (based on our own survey). Additionally, the shock absorbers and other suspension parts manufactured at KYB plants located in various locations are widely used throughout the world.

We have recently made available, for customers worldwide, our New SR Series and other KYB products designed for the car enthusiast. These products were previously available mainly in Japan and elsewhere in select countries and regions. All of KYB high-performance shock absorbers are manufactured at our facilities in Gifu. They undergo full vehicle testing and other evaluations. KYB puts considerable cutting-edge technology into its products, along with the know-how it has built by supporting racing and other, similar activities. While we have designed our products mainly for use in "JDM (Japanese Domestic Market)" models, we will be more proactive in pursuing the development of models that will have high demand among users in other countries as well.

## KYB AFTER MARKET Shock Absorbers

**DRIVING STABILITY**

**REPAIR & MAINTENANCE**

**BASIC STANDARD**

**RIDE COMFORT**

**HIGH-PERFORMANCE**

# NEW SR SPECIAL

**Are you tired of ordinary driving performance but don't want a harsh ride?  
KYB New SR SPECIAL is the perfect choice!**

## **Dependably enhancing the basic performance of running, turning and stopping in any car**

■ KYB suspension tuning experts perform full vehicle testing for the installation of New SR shock absorbers and determine the optimal suspension characteristics for your particular car model.

■ We also modify the specifications of the original shock absorbers, such as by increasing the cylinder diameter, if such change(s) can be made and are considered necessary for improved performance.

■ We have designed our New SR Series mainly for use in "JDM (Japanese Domestic Market)" models, but we will become more proactive in pursuing the development of models for which there is also high demand among drivers in other countries.

If you want to drive your car like a sports car, you'll probably change to sporty tires. However, you will then feel that your car's original suspension isn't enough.

For the next step, we recommend installation of the New SR shock absorbers on your car. The New SR shocks are designed for improved damping force as compared to your car's original suspension, through the reduction of unwanted phenomena such as roll, pitch and nose dive. As a result, your car will demonstrate better handling response, greater stability while driving, and a shorter braking distance. (This is because the tires can function effectively.)

Better handling

Good Cornering

Reduce brake distance

Additionally, because the New SR shocks keep damping force from becoming excessive, you can enjoy long-distance driving without fatigue. The New SR has the same shape as your car's original shock absorbers, but it offers greater durability than any other type of suspension (such as those that offer height adjustment). Moreover, the New SR provides the same stroke as your car's original suspension, so you can drive on irregular terrain to a certain degree. (When driving on irregular terrain, the bump and rebound strokes are important.)

Flat driving under uneven road

Thanks to all these features, KYB suspensions are employed by leading automakers such as Toyota, Nissan and Honda.

The New SR was developed based on motorsports technologies.

KYB gifu north plant

SUPER-GT race

Adopted to Carmaker

It may look no different from your car's original suspension, but the New SR was developed through an exhaustive series of tests conducted by professional drivers and engineers.

**If you want to enjoy advanced driving performance of your car, why not change to the New SR shock absorber?**

**NEW SR SPECIAL**

# Lower Sports

For Vehicles with Lowered Suspensions

**For cars with lowering springs,  
use shock absorbers that are specifically  
designed for them!**

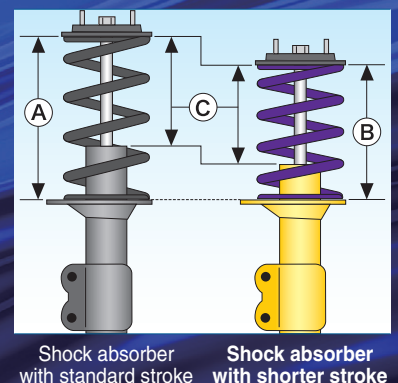

**KYB Lower Series is a range of short-stroke shock absorbers specifically designed for lowered suspensions. The Lower Sports shock absorbers can help the lowered suspension demonstrate its true performance.**

## ■ The Advantage of a Short-Stroke Shock Absorbers

When a lowering spring is installed, the ride height is lower (as indicated by (B)) than the height when a standard spring is installed (as indicated by (A)). However, when a short-stroke shock absorber is used, its stroke will be nearly the same as that of the original shock absorber (as indicated by (C)).

## ■ Lowering Coil Spring for Optimal Combination

KYB also offers lowering springs we have designed specifically, and confidently, for Lower Sports in order to meet the needs of drivers who want to install the kind of lowering coil spring that will work best with the shock absorbers they have installed, thus ensuring optimal suspension performance.

# The suspension must evolve together with the advance of high-end sedans. Extage: A new beacon for premium shock absorbers

High-end passenger cars are advancing rapidly today, thanks to power enhancements, increased rigidity, more sophisticated suspension structures and higher tire performance, among others. To accommodate high-end passenger cars, KYB has developed a new series of shock absorbers. Extage is a range of premium shock absorbers to which we have abundantly applied the latest and best cutting-edge technologies in which we take great pride.

## Introducing a New, Advanced Valve Construction

The internal valve construction determines the kind of mechanism that produces damping-force, and such a mechanism serves as the basic function of a shock absorber. We have completely changed the internal valve construction from the previous model and introduced an all-new valve design specifically for premium cars (i.e., the mono-tube type).

## Multi-Level (32-Level) Adjustment for Damping-Force to Meet a Wide Range of Driver Needs

KYB has introduced a feature that makes the damping-force adjustable over 32 levels (for some models, eight levels of adjustment with the rear shock absorber). This new feature makes it possible to choose an optimal setting for the damping-force, which varies according to the tires used and the kind of ride desired.

## Lowering Coil Spring for Optimal Combination

KYB also offers lowering springs we have designed specifically, and confidently, for Extage in order to meet the needs of drivers who want to install the kind of lowering coil spring that will work best with the shock absorbers they have installed, while helping to ensure the optimal suspension performance.

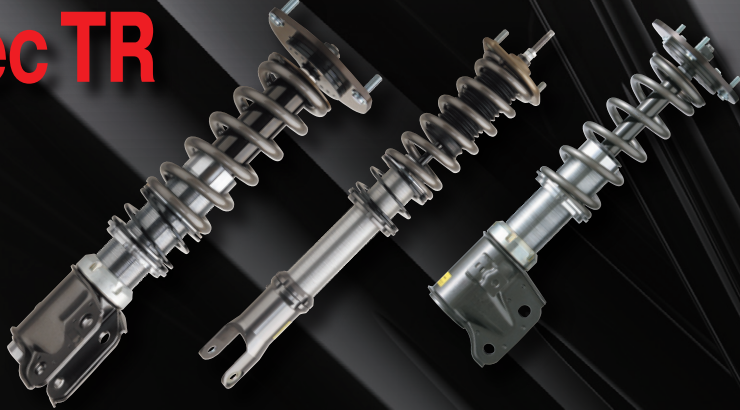

# REAL SPORTS DAMPER

## Meeting the Needs of All Drivers

It's the Ultimate Answer from KYB.

### Spec TR

- High-end coil-over kit for surfaced street and circuit use
- Height adjustable shock absorber (double action)
- Mono-tube & Twin-tube type selectable
- The world first DLC (Diamond-Like Carbon) film treatment piston rod for automobile
- Multi-Level (4-32 Level) adjustment of damping-force

\* Please ask the shop for details of this offering.

### Real Sports Mind from KYB

Friction control in the ultra-low speed range, achieved through the use of DLC (Diamond-Like Carbon), provides the ultimate settings desired by every driver who wants a reduced lap time on the circuit. A high-level roll balance ensures car behavior that is perfectly in sync with turn-in action, allowing the driver to experience a direct grip feel and excellent damping compliance. These circuit-worthy features are truly representative of KYB's flagship models for the motor-sports enthusiast.

### Spec GR

- Genuine Form coil-over kit for dirt-racing and rally use.
- Height adjustable shock absorber (genuine form coil-over)
- Twin-tube with reservoir tank
- 3 Way adjustment of damping force. (rebound-32 Level compression-16 Level (low-speed), stepless (high-speed))

### Gravel racing spirit from KYB

Spec GR the Real Sports Damper, the greatest of KYB sports suspensions is developed to conquer Gravel rally and Dirt trial. KYB has mobilized their own advanced technologies and precise parts to perform the high specification and durability. This specialized suspension to win the Gravel rally and Dirt trial, is adjustable for wide setting enables you to overwhelm rivals.

# NEW ADDITIONS in 2013

### ■ AIRTREK

That makes the turbo model an original setup that balances the following at a high level: the reduced impact from the road surface, improved steering response and corner damping.

**■ELGRAND**

[Vehicles manufactured in October, '00] Because front struts of different shapes are used in vehicles of this model year, check the following and choose the compatible part number before installation.

Front right side (Genuine part number)54302-VG225 (Stamped part number)54302-VG201 ⇒ Install NST5211R/NST5211L.

《Genuine part number》54302-VG227 (Stamped part number)54302-VG202 ⇒ Install NST5216R/NST5219L.

[Note] Please note that the active damper feature will be disabled if any of the following part numbers is installed in a vehicle that can be equipped with the active damper.

**ELGRAND**

[Vehicles manufactured in October, '00] Because front struts of different shapes are used in vehicles of this model year, check the following and choose the compatible part number before installation.

Front right side 《Genuine part number》54302-VG225 《Stamped part number》54302-VG201 ⇒ Install NST5211R/NST5211L.

《Genuine part number》54302-VG227 《Stamped part number》54302-VG202 ⇒ Install NST5216R/NST5219L.

[Note] Please note that the active damper feature will be disabled if any of the following part numbers is installed in a vehicle that can be equipped with the active damper.

**MOCO**

[Note 1]  Due to the delayed first year registration or other reasons, some vehicles may have a rear shock absorber with a different bottom shape even if the vehicles meet the compatibility requirements. Before placing an order, check the vehicle for the following:  
The length of eye bush at the bottom mount of the rear shock absorber 32mm → #SF1042  
The length of eye bush at the bottom mount of the rear shock absorber 60mm → NSF/WSF1042A

[Note 2] Spring seats of different heights are used in MG21S 04/2~04/12.  
Use NST/WST5243R/L for vehicles with genuine part No. 54302-4A0A0.

## SERENA

[C24 Series vehicles manufactured in October, '00] Because front struts of different shapes are used in vehicles of this model year, check the following and choose the compatible part number before installation.

Front right side (Genuine part number)54302-4N125 (Stamped part number)54302-4N100 ⇒ Install NST5220R/NST5220L.

(Genuine part number)54302-4N025/27/28/85/86 (Stamped part number)54302-4N002/03/04/12/13 ⇒ Install NST5219R/NST5219L.

(To find a genuine part number, check the number stamped on the shock absorber or check the motor vehicle inspection certificate at the car dealer.)

**SERENA**

[C24 Series vehicles manufactured in October, '00] Because front struts of different shapes are used in vehicles of this model year, check the following and choose the compatible part number before installation.

Front right side (Genuine part number)54302-4N125 (Stamped part number)54302-4N100 ⇒ Install NST5220R/NST5220L.

(Genuine part number)54302-4N025/27/28/85/86 (Stamped part number)54302-4N002/03/04/12/13 ⇒ Install NST5219R/NST5219L.

(To find a genuine part number, check the number stamped on the shock absorber or check the motor vehicle inspection certificate at the car dealer.)

**SUNNY AD VAN**

[Note 1] Because front shock absorbers of different shapes are used, check the following and choose the compatible part number before installation.

Front right side (Genuine part number)54302-WD326/328 (Stamped part number)54302-WD301/303⇒ Install NST5340ZR/NST5340ZL.

(Genuine part number)54302-WD100/125/325/327 (Stamped part number)54302-WD100/300/302⇒ Install NST5340ZR/NST5340ZL.

[Note 2] Because rear shock absorbers of different shapes are used, check the following and choose the compatible part number before installation.

Both the rear left and right (Genuine part number)56210-WA925 (Stamped part number)56210-WA900⇒ Install NSF9151.

(Genuine part number)56210-WD325/326 (Stamped part number)56210-WD300/301⇒ Install NSF9114Z.

**LEGACY**

★ If a 7-digit model number is shown in the model column, check the "Applied Model" number stamped on the plate located inside the engine bay of the vehicle.

[Note] The diameters of the top bolts on the struts of part numbers 5066/5085/5111/5121/5176R/L shown in the table below are M14 and are different from M12 of the genuine shock absorber.

[Note] This KYB shock absorber package is not compatible with vehicles with a Bilstein model. (Excluding vehicles with "Bilstein" shown in the Vehicle Details column.)

\* NSF9801 comes with the self-leveling feature.

**LEGACY**

★ If a 7-digit model number is shown in the model column, check the "Applied Model" number stamped on the plate located inside the engine bay of the vehicle.

[Note] The diameters of the top bolts on the struts of part numbers 5066/5085/5111/5121/5176R/L shown in the table below are M14 and are different from M12 of the genuine shock absorber.

[Note] This KYB shock absorber package is not compatible with vehicles with a Bilstein model. (Excluding vehicles with "Bilstein" shown in the Vehicle Details column.)

\* NSF9801 comes with the self-leveling feature.

**PLEO**

[Note] In the grade RS (both 2WD and 4WD), the rear disc brake gets engaged when the vehicle height is lowered. This is because, due to how the wire is routed, the brake wire gets pulled as the vehicle is lowered.

It is recommended that full stroke of the parking brake be 'adjusted from the normal fifth notch to 10th or more notch'.

**Extage Suspension Kit : Compatibility Chart by Car Type**

The Extage Suspension Kit is a set of shock absorbers and special springs for one car.

\* Even when special bump stops are provided with the kit, if the original bump stop has integrated dust boot protection, the use of the original bump stops is recommended.

\* The amount of reduction in height from the original height is the actual measurement taken from a vehicle tested under the conditions set by KYB. The amount of reduction may differ slightly, according to the specifications and/or individual characteristics of your car.

Year	Model	Model number of Extage kit for one car	F/R	Amount of height reduction from original height(mm)	Spring rate		Bump stop	Number of damping force adjustment levels	Kit description	
					N	kg/mm			Extage spring model number	Extage model number
