**LONG LIGHT**

Studiate per rispondere alle esigenze della nuova regolamentazione Europea che obbliga all'accensione delle luci anche di giorno, la gamma Long Life, grazie alla nuova tecnologia con gas Krypton, offre all'automobilista un prodotto la cui durata (influenzata dalla condizioni di utilizzo) può arrivare fino al doppio rispetto a quella di una lampada Standard.

HEAVY DUTY

Le lampade Heavy Duty a 24 Volt fabbricate con filamenti rinforzati e con saldature di Tantalio, offre ai veicoli industriali sottoposti a forti sollecitazioni (macchine movimento terra e macchine agricole) una maggiore resistenza a colpi e vibrazioni assicurando una durata superiore.

XENON LIGHT +50%

La gamma di lampade XENON LIGHT di MAGNETI MARELLI fornisce il 50% in più di luce rispetto ad una lampada alogena convenzionale, grazie al riempimento con gas Xenon della ampolla, che è realizzata in una particolare sfumatura di azzurro. La maggior visibilità ottenuta genera una maggiore sicurezza nella guida. L'utilizzo di questa lampada è particolarmente consigliato a chi, anche in modo saltuario, percorre strade con una segnaletica ridotta.

BLUE LIGHT

L'obiettivo della gamma di lampade BLUE LIGHT di MAGNETI MARELLI è quello di permettere una visione notturna con la stessa nitidezza che procura la luce diurna. La tecnologia di queste lampade fornisce infatti una maggior definizione del campo visivo. La morbidezza della luce azzurra permette inoltre di ottenere una migliore visibilità senza abbagliare i veicoli che circolano in senso contrario. Per questo motivo, è raccomandato il suo utilizzo a chi circola spesso in autostrada o su strade con molto traffico.

ALL SEASON

La luce di tonalità gialla che connota le lampade ALL SEASON di MAGNETI MARELLI "fora l'aria" anche nelle peggiori condizioni climatiche garantendo una buona visibilità anche in presenza di: pioggia, nebbia, neve, ecc. Vedere ed essere visto meglio è essenziale per aumentare la sicurezza su strada in regioni con climatologie frequentemente perturbate o nel periodo invernale.

RALLY

I 100 watt di potenza delle lampade della gamma RALLY di MAGNETI MARELLI forniscono una luminosità eccezionale. Il loro utilizzo deve essere limitato alla guida sportiva in circuito o ad altre applicazioni al di fuori delle strade normali: opere pubbliche, applicazioni navali, ecc. Attenzione queste lampade per le loro caratteristiche esasperate non sono omologabili secondo la norma E.C.E. R37 e quindi non possono essere utilizzate nella guida sulle strade di normale circolazione.

SINGLE COIL

Le lampade SINGLE COIL 24V di MAGNETI MARELLI, grazie all'innovativo filamento più lungo e resistente rispetto a quello delle tradizionali 24V, forniscono un'intensità luminosa superiore del +100% ad una distanza di 50-100 mt. e il raddoppio della vita della lampada. Per questi motivi sono ideali per i veicoli industriali, consentendo una maggior sicurezza specialmente nei lunghi viaggi.

**LONG LIGHT**

Designed to be adapted to the new European regulation of daytime running light, the range of lamps LONG LIFE, thanks to the new technology of Krypton gas, offers to the users double life than a standard lamp.

HEAVY DUTY

The 24 volt HEAVY DUTY lamps manufactured out of Tantalum enforced filaments offers to the industrial vehicles with more demanding work situations (trucks, vehicles of works, agricultural,...) a better resistance to shock and vibration to assure a best durability.

XENON LIGHT +50%

The XENON LIGHT range of bulbs from MAGNETI MARELLI, supply 50% more light than a conventional halogen bulb. This is due to a combination of use of Xenon gas and a specially designed glass bulb crowned with a blue strip. The improvement of the obtained light leads to an increase of safety driving, being specially pointed on poorly signalised roads.

BLUE LIGHT

To see at night as under daylight glare is the aim of the BLUE LIGHT range of bulbs from MAGNETI MARELLI, technologically designed to allow a better visual range definition. The softness of the blue light allows a better visual perception without blinding the opposite drivers. For this reason, its use is recommended when driving on a highway or highly trafficked roads.

ALL SEASON

The yellow bulb produced by ALL SEASON range of bulbs from MAGNETI MARELLI hits the air on the worst atmospheric conditions getting the best visibility under bad weather: rain, fog, snow, etc. To see and to be seen better it is a basic principle to increase the safety in driving in regions with climatology prone to atmospheric interferences.

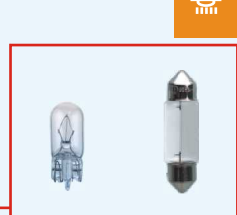

RALLY

The 100 watts power of the RALLY range of bulbs from MAGNETI MARELLI supply the maximum brightness. Its use is restricted to competition circuits or other off road applications (heavy duty works, marine applications, etc). As they are not homologated according to E.C.E. R37, they cannot be applied to public road.

SINGLE COIL

Thanks to the longer innovative coil sturdier than the one of the traditional 24V bulbs the SINGLE COIL 24V range of bulbs from MAGNETI MARELLI supply 100% higher light output at 50-100 meters ahead of the vehicle and a double bulb's life. For those reasons these bulbs are ideal for industrial vehicles, allowing a higher safety especially during long journeys.
