SEE THE WORLD IN A NEW LIGHT

OSRAM

A new appearance for the OSRAM website.

No diversions on the road to the best automotive lighting – www.osram.com

All the products, important applications, practical tools, useful services, current trends, interesting knowledge: the new OSRAM website is all about the entire world of light – but with a more modern, clearer design. And something for all car-lovers: The Automotive area no longer need be reached via another section, but can now be accessed directly from the home page with a single click.

Automotive Special –

special products deserve special attention

The Automotive area cannot only be reached more quickly, but, with its special contents, tools and services, is now more important than before. Whether you want powerful and stylish lighting, the latest trends or news hot off the press: Automotive Special offers you and your customers a wide range of information and options to stay up to date in the field of automotive lighting and to have interesting new experiences.

Automotive LED microsite – all about LEDs

Experience, in an interactive manner, the innovative LED solutions you can use to give your vehicle a sense of style, both inside and out - from daytime running lights, through trunk, numberplate, instrument and glove box lighting through to accessories.

Automotive Online tool – everything you need

The complete list of spare vehicle lamps - now including interior lighting: select the make, model and construction year of your car, truck or motorcycle and get an overview of the matching OSRAM lamps and their article numbers.

Automotive lighting blog – the new hot topic

For specialists in the field of automotive lighting, and those who would wish to be so - continuous up-to-date and updated exchange of information and opinions under various headings such as "News", "Innovation", "Technology", "Law" or "Campaigns".

"Vehicle Light" app – for smartphones

To ensure that you always know which lamp type is required for the vehicle, even while on the move – from dipped and full-beam headlights through indicator and brake lights to reversing lamps. For passenger car drivers and motorcyclists as well as numerous models for the most important truck manufacturers.

1) These products do not have ECE approval. This means that they cannot be fitted in "normal" headlights or additional headlights if the vehicle is to be used on public highways. | OFF-ROAD only. | Not for use on public roads.
All OSRAM 12 and 24 V halogen automotive lamps are UV-reduced, can replace existing lamps and meet all the relevant standards, e. g. ECE R 37 (with the exception of OFF-ROAD lamps).

Our ideas lead the way

The mobility concepts for the future are based firmly on vehicles with low emissions but high performance. As the world market leader in automotive lighting, OSRAM is setting the pace in researching and developing new types of lighting systems. The result is a series of technologies that are economical yet powerful, refined yet simple, enhancing both comfort and safety on the roads.

There are numerous reasons why OSRAM leads the world in automotive lighting. Not only do we supply innovative products, we actively support retailers and workshops with high-performance sales logistics and reliable delivery service. Training courses and intensive advertising and PR activities ensure optimal consulting quality and higher sales.

On the spare parts market too, our products meet the same high quality standards that automobile manufacturers demand for their new cars (as per Directive EU 1400/2002).

Optimum light for faster reactions

NIGHT BREAKER® PLUS is the ideal lamp for drivers who want to drive more safely with more light and stay relaxed. With patented blue ring coating for less reflected glare, this halogen lamp produces up to 90 % more light on the road, has a beam that is up to 35 meters longer and provides light that is up to 10 % whiter. The longer beam means that drivers can spot obstacles and dangerous situations much sooner. It focuses the light 75 to 100 meters ahead of the vehicle – precisely where the driver needs it. The extra reaction time can be the difference between life and death! Now with up to 50 % longer life compared with the first-generation NIGHT BREAKER®.

The beauty of light – XENARC®

The fascinatingly bright xenon light continues its triumphant march. Having conquered the top-of-the-range market, it has now moved into the mid-range market. Gas discharge lamps with their innovative arc technology generate up to 100 % more light than halogen lamps at 300 % greater luminous efficacy. Modern lighting concepts from OSRAM offer far more than safe and comfortable driving. They underline personal lifestyles, demonstrate environmental awareness and stand for a new sensation in light. Besides the XENARC® ORIGINAL and XENARC® COOL BLUE® INTENSE with their particularly high-contrast blue xenon light for design-conscious drivers, OSRAM can now offer the most powerful xenon automotive lighting in the world, in the form of the new XENARC® SILVERSTAR®: you couldn't have more light!

LEDs are extremely popular – with both manufacturers and drivers

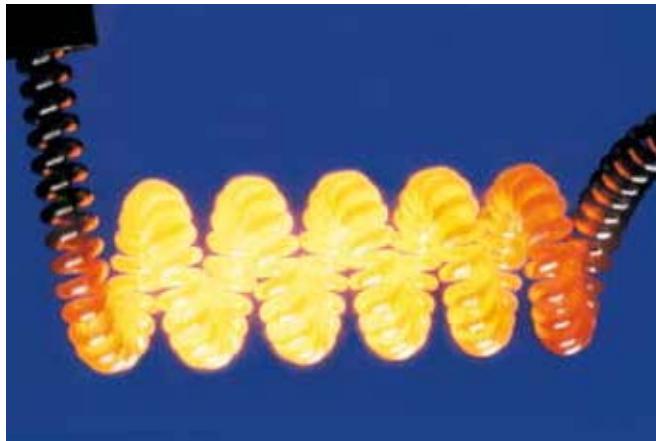

LED technology is also gaining ground in automotive lighting. In order to make the best use of the turnover potential of this huge future market, OSRAM developed the world's first standardized LED system in 2005 in the form of Joule, which

is now being used by leading car manufacturers for their new models. And now OSRAM is clearing the way for LEDs to take over the mass market: The new OSRAM LED Automotive product range offers drivers innovative, stylish products with a high light effect and user value – from the complete headlight kit, thru retrofit lamps for interior lighting to modern reading lights or flashlights.

Freedom of design par excellence. OSRAM SNAP^{IN}LITE®

In addition to LED technology, OSRAM offers its partners a series of innovations with great market opportunities. OSRAM SNAP^{IN}LITE®, which has been approved for use throughout the world, has an intelligent base design that makes changing lamps very easy. The lamp can be installed without involving any cables, separate connectors or retaining springs. The OSRAM SNAP^{IN}LITE® concept provides great freedom in the development of new, multifunctional headlight models. The low base height and particularly small reflectors save space and weight, opening up a wide range of possible applications.

Shining a light on OEM quality

“Total Quality Management” (TQM) is the corporate principle on which OSRAM defines its quality standards. It covers the demands that we place on the finished products, components and parts, as well as on the requirements for optimizing our processes and organization. Compliance with this principle is confirmed by the fact that our quality management system has been certified to ISO 9001 and our environmental management system to ISO 14001.

OSRAM manufactures for OSRAM

One of our principles is to develop as many of our own production facilities as possible. We manufacture major pre-materials, develop our own production processes and construct complex, computer-controlled production plants. Development and manufacture of all products at OSRAM is certified to DIN EN ISO 9001.

The Business Segment “Automotive Lighting” and all the lamp filaments produced for this Business Segment are certified according to TS 16949 (special quality management requirements for automotive suppliers).

Our aim is to get better and better

To keep our strategies and activities in perfect tune with the needs of our customers, we are in close contact with all our lobby groups. What's more, we conduct extensive and targeted opinion polls among customers in 29 different countries each year. In this way, we are able to improve the quality of our products and services and defend our number one position in the face of tough international competition.

Vehicle lamps from OSRAM are renowned for their outstanding precision, reliable operation and impressive durability. They put the ideal amount of light on the road without blinding oncoming drivers¹⁾ and therefore contribute greatly to road safety.

OEM quality

All the lamps comply with the quality requirements of car manufacturers and therefore surpass the requirements of European standards. You can always rely on OSRAM lamps.

1) If used as specified

Sustainable production for the sake of the environment

Sustainability is an essential part of our corporate philosophy. OSRAM therefore uses as few hazardous substances as possible, saves energy at every opportunity and reduces the amount of packaging material wherever it can. Environmental protection is much more for us than just meeting statutory requirements. Our comprehensive environmental management system ensures that our principles are always put into practice. As a member of the United Nations Global Compact, OSRAM is committed to ecologically and socially sustainable development throughout the world.

Hazardous substances

There are strict restrictions on the use of hazardous substances in all areas of the company – from development and production to the cleaning processes in the operational facilities. OSRAM makes use of highly developed technologies to reduce the use of hazardous substances to the absolute minimum necessary to ensure correct operation.

Energy

In terms of energy savings, OSRAM has two claims to fame. First, the company itself saves on resources by developing and operating safe and clean plants that need less and less energy. Second, it develops energy-saving products that meet the needs of eco-conscious customers.

Packaging

OSRAM makes use of the latest eco-friendly developments for its packaging. The majority of products are packaged in cardboard boxes or blister packs and then in corrugated cardboard cartons as packaging units. Therefore, the recycling quotas here are particularly high: 80 % for cardboard boxes and blister packs, and between 70 % and 90 % for corrugated cardboard cartons.

OSRAM LED

Stylish highlights for interiors and exteriors

More style, modern, brighter light and simple retrofitting: The LED daytime running light kit and the LED retrofit lamps from OSRAM are the choice of drivers, who place emphasis on design and tuning.

OSRAM LED LIGHT@DAY® daytime running and position light

First retrofit daytime running light with uniform LED light surface: no LED light points visible

- Marked design: The curved design makes the vehicle seem more dynamic
- Dual function: Daytime running and position light (optional)
- Up to 6000 Kelvin
- Suitable for many vehicle models, easy installation
- Low power consumption
- Thanks to the high IP 69K protection rating, intensive car washes do not pose a threat to the LED daytime running light
- ECE R87 approval

OSRAM LEDriving® daytime running light

- Up to 5200 Kelvin
- IP 67 protection rating

OSRAM LED Retrofits for interiors or off-road¹⁾

Best LED light by state-of-the-art visual diffuser material

- Completely new light effect thru a color temperature of up to 6000 K
- Up to 80 % lower power consumption than standard lamps
- Uniform light, no spotty lighting
- Lamp types with high sales potential:
LEDW5W, LEDT4W and LEDC5W (structure corresponds to the halogen variants C5W, W5W and T4W)
- Each in „warm“ (4000 K) and „cool“ versions (6000 K)
- LED retrofit lamps for numberplate lighting (off-road use)

OSRAM LED Accessories

That certain something

Fine, functional design and high-quality materials make the mobile LED products from OSRAM a real eye-catcher and an indispensable accompaniment.

More mobility, more opportunities

In the car, at home, in the office, at leisure, playing sport, on the move or on holiday: the attractive and practical reading lamps and torches are the ideal choice, any place, any time. They are particularly popular with design-conscious customers, in particular women, families and younger target groups.

More design, more quality

- Only from OSRAM: innovative charging concept via USB interface
- Completely unique design and high-quality materials – particularly fine visual and haptic appearance
- Pleasantly soft, easy-grip and dirt-resistant surface
- Up to 20,000 hours LED service life

OSRAM XENARC® SILVERSTAR®

The most powerful xenon automotive lighting in the world

The highlight in the xenon market: With up to 30 % more light on the road and a light beam which is up to 20 meters longer than standard xenon lamps, the OSRAM XENARC® SILVERSTAR® is the world's most powerful xenon headlamp light.

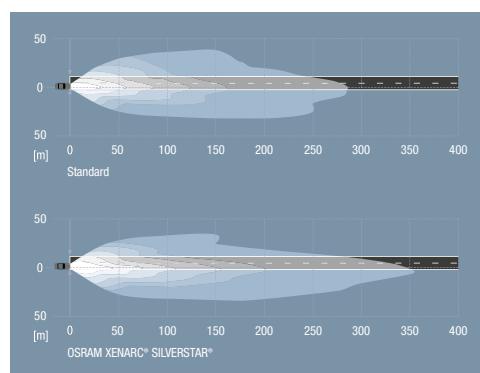

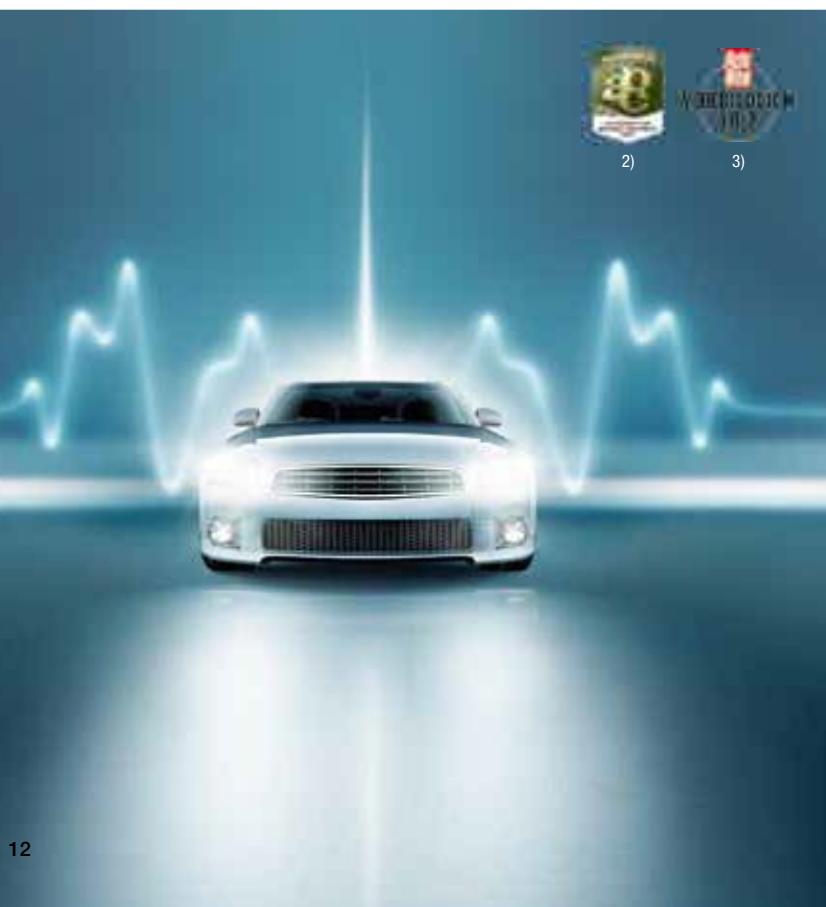

Even more light, even greater safety

OSRAM XENARC® SILVERSTAR® is the perfect choice for all drivers, who value maximum visibility and safety. The increased quantity of light, compared with standard xenon lamps, means visibly improved road illumination. For drivers, this means: even more safety, as concentration is enhanced, allowing faster reactions.

This puts all the competitors in the shade

- The most powerful xenon automotive lighting in the world
- More than 30% more light than standard xenon lamps
- More than 130 % more light than halogen lamps
- Light beam up to 20 m longer¹⁾ than standard xenon lamps

XENARC® lamps should be changed by a qualified mechanic.

OSRAM XENARC® COOL BLUE® INTENSE

Cool look for design professionals

It is exceptionally bright, offers high contrast and is now brilliantly blue. The xenon light of the XENARC® COOL BLUE® INTENSE is an impressive demonstration of OSRAM's innovation power. With its highly efficient technology, brilliant effect and no-compromise design, it represents light for a new generation.

Outstanding technology

Xenon light is not just the "non plus ultra" for automobile specialists, it is also highly desirable for drivers looking for visionary technology. The new OSRAM XENARC® COOL BLUE® INTENSE produces a bluish light that offers high levels of contrast at usual HID luminous flux. The benefits of this technology provide a perfect view of the road ahead and individual styling.

A feast for the eyes – XENARC® COOL BLUE® INTENSE

- COOL BLUE® effect with the tried-and-trusted HID luminous flux
- Up to 20 % more light¹⁾ for perfect road surface illumination
- Maximally uniform, high-contrast light for safe, fatigue-free driving
- ECE-approved with DOT labeling
- Long life
- Stylish, modern appearance on the road

XENARC® lamps should be replaced by a qualified mechanic.

XENARC® electronic D1S/R, XENAELECTRON® control gear and the associated connecting cables form a perfectly matched system from OSRAM.

OSRAM XENARC®

An innovation for heightened driving comfort

OSRAM has given vehicle lighting a whole new intensity with the arc technology of the XENARC® family of lamps. The D3 and D4 XENARC® systems prove that environmental concerns are very much at the forefront of OSRAM's thinking in its product development activities. They offer the full output of xenon light entirely without mercury.

The first xenon light without mercury

OSRAM is pushing the boundaries in environmental protection and efficiency with the XENARC® systems D3, D4, and now with the particularly energy-saving D8. Arc technology produces an extremely bright arc of light from an electronically controlled gas discharge. This produces twice as much light as the filament in a halogen lamp. Good illumination of the road ahead is one of the factors that contribute to driver comfort, so even long journeys through the night are more relaxed than ever before. A color temperature similar to that of natural daylight also helps keep drivers relaxed. With an average life of up to 3,000 hours, lamps generally outlast the average automobile. In such cases, there are no costs for maintenance or replacement

Better visibility, greater safety

- Very bright arc produced by an electronically controlled gas discharge
- Up to 100 % more light than halogen lamps
- At 4,150 K, it has a color temperature closer to natural daylight than conventional halogen light (3,200 K) and is therefore easier on the eyes
- Better illumination of the road reduces the risk of accidents
- The D3 and D4 XENARC® systems are mercury-free and therefore more eco-friendly
- CO₂ reduction: xenon saves 50 % energy (corresponding to 1 g CO₂/km) compared to standard halogen lamps
- Further 30% energy savings with D8S

The filament of a halogen lamp, compared to the arc of a XENARC® lamp.

XENARC® electronic D1S/R or D3S/R, XENAELECTRON® control gear and the associated connecting cables form a perfectly matched system from OSRAM.

OSRAM XENAELECTRON®

Systematic power

Perfectly matched system solution from OSRAM: The strength of the XENARC® D1/D3 system lies in the perfect combination of individual components.

Stronger together: 1 +1 = 3!

The XENAELECTRON® XT5-D1/12 V/24V, XENAELECTRON® XT6-D3/12 V or XENAELECTRON® 25XT6 control gear for the newly developed D8 systems for mercury-free gas discharge lamps with a power consumption of only 25 W (XENARC® D8S) are connected to the OSRAM D1/D3/D8 lamp XENARC®.

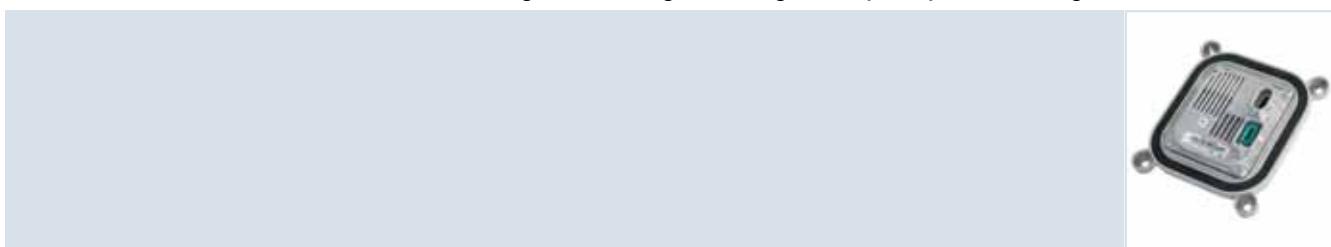

Professional electronics from the system expert

- Perfectly matched to OEM automotive requirements
- Compact design of the XENAELECTRON® control gear
- Excellent EMI performance
- Modular construction for use in different headlight designs

Note: Because of their high voltage, XENAELECTRON® control units may only be replaced by properly trained personnel.

The cables are available with different connector configurations and in various different lengths.

XENARC® electronic D1S/R or D3S/R together with the XENAELECTRON® control gear and the associated connecting cables, form a perfectly matched system from OSRAM.

OSRAM NIGHT BREAKER® PLUS

The world's most powerful automotive halogen lamp

Unrivaled brilliance has a name: OSRAM NIGHT BREAKER® PLUS! The lamp produces more light and creates a longer beam than any other halogen lamp. More technology for longer life.

Optimum light for faster reactions

NIGHT BREAKER® PLUS is the ideal lamp for drivers who want to drive more safely with more light and stay relaxed. With patented blue ring coating for less reflected glare, this halogen lamp produces up to 90 % more light on the road, has a beam that is up to 35 meters longer and provides light that is up to 10 % whiter. The longer beam means that drivers can spot obstacles and dangerous situations much sooner. It focuses the light 75 to 100 meters ahead of the vehicle – precisely where the driver needs it. The extra reaction time can be the difference between life and death!

Fighting the dark forces – day and night

- Up to 90 % more light on the road¹⁾ for better visibility and much longer reaction time
- Up to 35 m longer beam of light¹⁾
- Up to 10 % whiter light¹⁾ for comfortable, fatigue-free driving
- Up to 50 % longer life²⁾ (Extra Lifetime)
- Eye-catching design with partial, blue coating and silver cap (H4/H7/H11/HB4)
- Gold-plated contacts (H4/H7) for excellent corrosion protection, outstanding conductivity and high-class look

NEW

OSRAM SILVERSTAR® 2.0

Synonymous with more power and greater safety

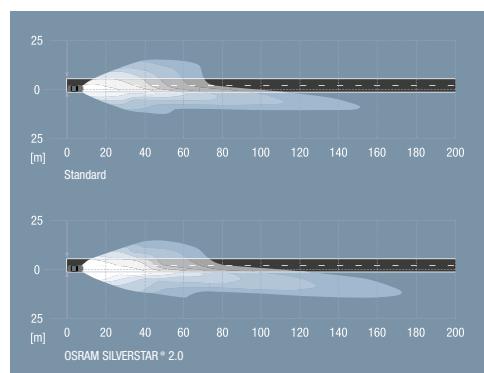

The new star lamp for drivers who place emphasis on safety, performance and price: OSRAM SILVERSTAR® 2.0 is one of the best current light solutions for all categories.

Safety in the dark.

Long journeys at night call for full concentration on the part of the driver. A lamp with better illumination of the road will make driving easier and raise awareness considerably. Vehicles equipped with OSRAM SILVERSTAR® 2.0 therefore have a crucial advantage in terms of safety. Up to 50 % more light on the road at 50 to 75 m in front of the vehicle enables drivers to spot road signs, obstacles and other dangers sooner so they can react in good time.

SILVERSTAR® 2.0 speaks for itself.

- Up to 60 % more light on the road¹⁾ for greater safety
- Up to 20 m longer beam¹⁾
- Up to double the service life²⁾
- Modern design with silver cap, ideal for all clear-glass headlights (H4/H7)
- For the performance-conscious driver

2) Compared to the first generation of SILVERSTAR®

OSRAM COOL BLUE® INTENSE

Stylish and safe

OSRAM COOL BLUE® INTENSE provides stylish and powerful light on the road. Its bright bluish-white light is almost in the same league as the light from attractive xenon lamps.

Cool light, strong effect

COOL BLUE® INTENSE produces high-contrast light similar to natural daylight and is therefore easier on the eyes than the light from conventional headlights. The bluish-white light has a color temperature of up to 4,200K, making it an attractive lamp and putting many other “blue” lamps firmly in the shade. COOL BLUE® INTENSE H4, H7, H11 and HB4 lamps have an eye-catching design, perfect for style-conscious drivers. Behind the clear glass, the silver cap blends perfectly with the reflector. This effect is reinforced by the use of the W5W Halogen COOL BLUE® INTENSE as parking lights.

Features at a glance

- Modern, bright bluish-white light
(up to 4,200K, similar to light from xenon lamps)
- Up to 20 % brighter than standard lamps
(subjective impression)
- High-contrast illumination of the road
- Optimized design with a silver cap (H4/H7/H11/HB4),
ideal for clear-glass headlights
- Available for all front lighting functions
- For the design-conscious driver

OSRAM DIADEM® and DIADEM® CHROME

Visual tuning for indicator and tail lamps

Modern aesthetic light supplement – for halogen and xenon headlamps:

DIADEM® and DIADEM® CHROME are the perfect signal lamp solution for drivers who place emphasis on design.

Harmonious from front to back

OSRAM DIADEM® and DIADEM® CHROME have the most advanced interference coating. Their surface therefore has an opalescent appearance – the lamp only appears amber or red when it is on. This design effect is ideal for all indicator and reversing/brake lights with clear covers.

Noticeably unnoticeable – each in their own way

- Only colored when working
- Interference coating
- Color does not fade over time
- DIADEM® – lifespan up to 2x longer¹⁾
- DIADEM® – discreet bluish shimmer when switched off
- NEW: DIADEM® Chrome – almost invisible when switched off

OSRAM ULTRA LIFE

The most durable halogen automotive lighting in the world, guaranteed

ULTRA LIFE lamps last up to three times longer than conventional automotive lamps. For ULTRA LIFE headlamps that are not in commercial use, OSRAM is also the first manufacturer to offer a three-year guarantee¹⁾.

OSRAM ULTRA LIFE – now with a 3-year guarantee

So annoying: a headlight lamp suddenly fails in the middle of the night. A replacement lamp has to be found and installed quickly because driving with one headlight is a huge safety risk. Drivers who are often on the road at night or who do not want to go without the safety of low beam light during the day are well aware of this situation. Because they are in almost constant use, the headlights of these drivers fail more often than usual. Owners of vehicles with headlight lamps that are difficult to access also save themselves time and money with the new ULTRA LIFE lamps. And the environment also benefits as fewer replacements means less waste.

Ultra variety for any automobile

- The first automotive brand lamp to have a 3-year guarantee
- Lasts up to three times longer than a conventional automotive lamp
- Unique reliability
- Suitable for all vehicle types
- Modern design with a silver cap (H4/H7), ideal for clear-glass headlights
- Approved for use throughout Europe

Now with
3 year
guarantee!¹⁾

OSRAM MOTORCYCLE LAMPS

OSRAM motorcycle lamps

Power and Emotion

In NIGHT RACER® PLUS, SILVERSTAR® and X-RACER®, OSRAM opens up a new dimension for life on two wheels – for relaxed cruisers and sporty riders.

See and be seen:

Life insurance for motorists

The OSRAM high performance lamps, approved throughout Europe, all guarantee more visibility and safety. NIGHT RACER® PLUS are a must for uncompromising riders, who only want the best. There is no more effective, reliable halogen light for bikes. Specially designed for mopeds, the SILVERSTAR® HS1 offers plenty of light at a reasonable price. And anyone wanting to look good whilst looking out will choose X-RACER®. The bluish light is right up to date, looks cool and also does not hurt the eye.

OSRAM NIGHT RACER® PLUS

- Up to 90 % more light on the road ahead¹⁾ for maximum visibility, longer reaction times and maximum safety
- Up to 35 m longer beam of light¹⁾

OSRAM X-RACER®

- Modern bright bluish-white light (up to 4,000 K, similar to light from xenon lamps)
- Up to 20 % brighter¹⁾ (subjective perception)

OSRAM SILVERSTAR®

- Up to 50 % more light on the road¹⁾
- Up to 20 m longer beam of light¹⁾

Purchasing tip²⁾

Spare lamps – compulsory in several countries!

The carrying of spare lamps is recommended in Germany and a statutory requirement for motorcyclists in many European countries. No problem: NIGHT RACER® PLUS and X-RACER® are also available in double packs – one lamp for immediate replacement and a spare lamp as a reserve.

reddot design award
winner 2009

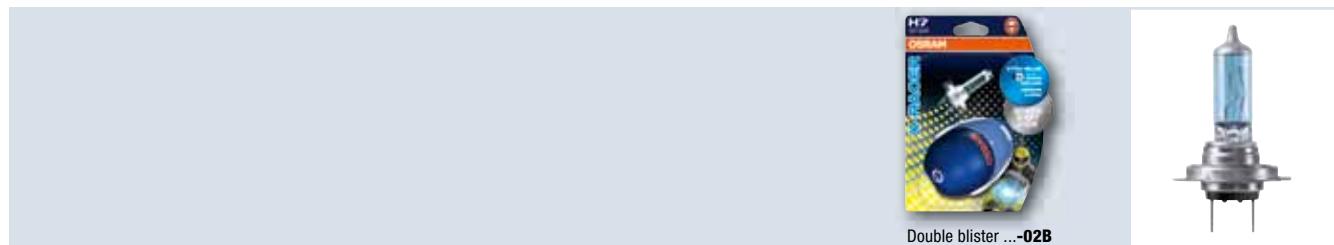

Cool light, cool packaging
For its motorcycle spare lamp box, OSRAM won the coveted trophy in the "Communication Design" category.

OSRAM ORIGINAL LINE 12V

The classic

The lamps in the OSRAM ORIGINAL LINE 12V family are highly reliable and have an excellent price-to-performance ratio. Customers who appreciate good quality will be making the right choice with the ORIGINAL LINE 12V.

Peak performance – reliable and cost-effective

It is certainly no coincidence that OSRAM is the world market leader in vehicle lamps. Either as standard initial equipment or as spare parts, the ORIGINAL LINE 12V family is an extremely popular and successful workhorse. With its excellent price-to-performance ratio and outstanding quality, it is the lamp of choice for a wide range of customers. Its combination of first-class quality, impressive brightness and reliable life gives it a real advantage over other products on the market. The amount of light produced does not decrease over time but remains well within the prescribed safety margins from day one until the very end.

The tried and tested solution for standard requirements

- OEM quality
- Excellent price-to-performance ratio
- Successfully used in millions of new automobiles from renowned manufacturers
- Impressive brightness and reliability

OSRAM TRUCKSTAR® PRO

Three requirements, one solution.

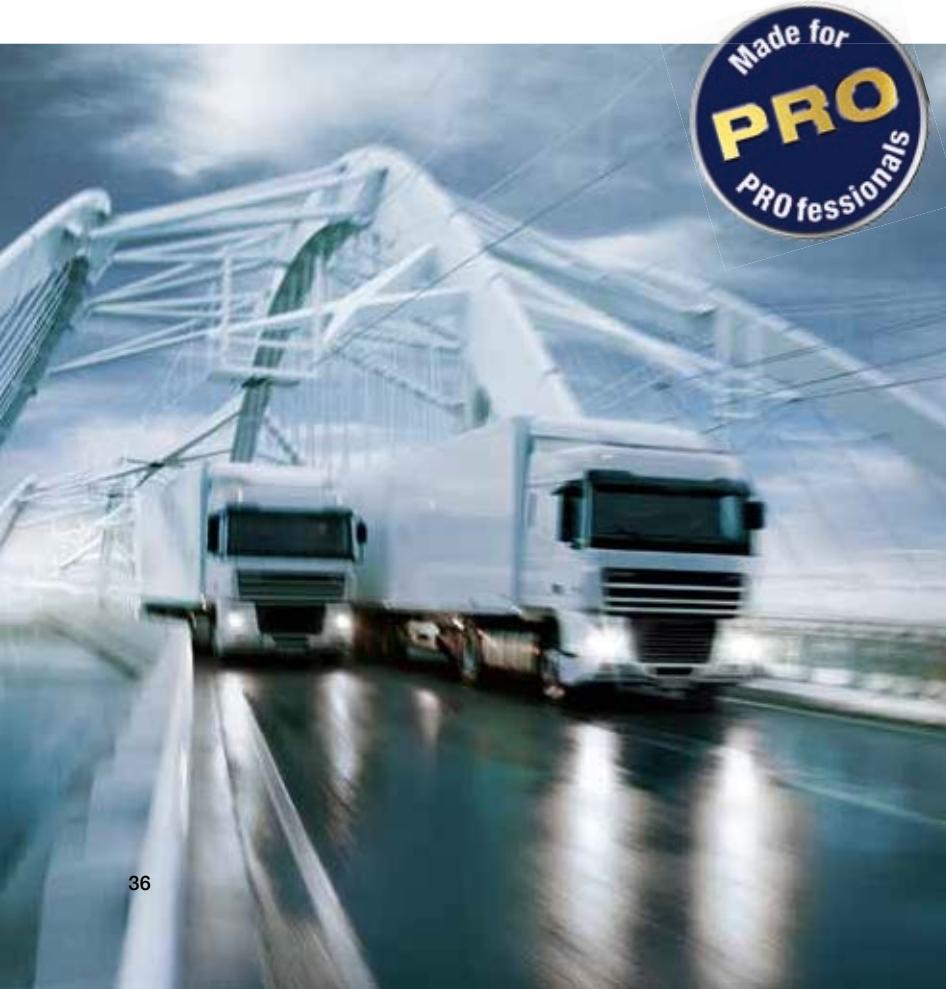

At night, truck drivers need the best possible light on the road ahead. OSRAM TRUCKSTAR® PRO is far ahead of conventional 24 V lamps, allowing drivers to concentrate on the essentials. With its extremely long life and robust construction, it also saves on replacements, downtime and fleet costs.

Twice as bright, more than twice as long

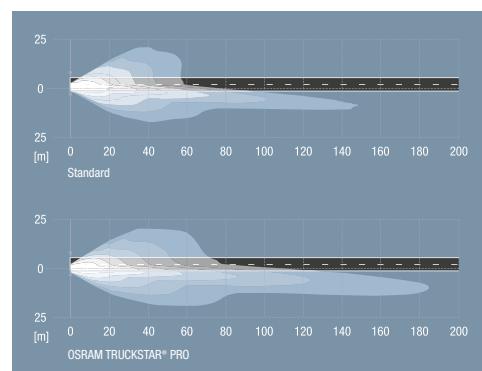

Compared with conventional 24 V lamps, the OSRAM TRUCKSTAR® PRO has a distinct advantage thanks to its patented single-coil technology. This technology results in up to 100 % more light on the road¹⁾, making it much easier for truck drivers to concentrate – a massive benefit in terms of road safety. The uniform and up to 40 m longer¹⁾ light beam enables dangers to be seen much sooner and gives drivers valuable extra time in which to react. OSRAM TRUCKSTAR® PRO is capable of withstanding strong vibrations, which saves time and money thanks to more than double the life¹⁾.

Robust power packs for enhanced safety.

- Up to 100 % more light on the road¹⁾ thanks to patented single-coil technology (SC)
- More than twice the life of conventional 24 V lamps
- Greater safety thanks to better illumination of the road
- Lower costs thanks to reduced failure rates as a result of improved vibration resistance
- Cost/benefit calculator on the OSRAM homepage, www.osram.com/truckstar-tool
- For drivers looking for heavy-duty/longlife lamps

Innovation made by OSRAM: Thanks to the new and patented single-coil technology (above right), the OSRAM TRUCKSTAR® PRO will last more than twice as long¹⁾ as lamps with conventional double coils (above left).

1) Compared with standard lamps (depending on the headlight system)

OSRAM ORIGINAL LINE 24V

The classic for heavy loads

Customers world-wide place their trust in the performance of OSRAM ORIGINAL LINE 24 V lamps, as they combine absolutely reliable quality with a fair price.

Continuously safe and reliable

OSRAM ORIGINAL LINE 24 V lamps continue to provide safe light thru all their lives, making them a balanced and economical solution for all standard requirements in the 24 V sector. The performance of inferior-quality lamps decreases over time, jeopardizing the safety of the driver, possibly without the driver being aware of this.

All-round quality

- OEM quality
- Excellent price-to-performance ratio
- Successfully used in millions of new vehicles from renowned manufacturers
- Impressive brightness and reliability

OSRAM SPECIAL OFF-ROAD LAMPS

Versatility from OSRAM

Rally and HYPER lamps from OSRAM are ideal when the going gets tough. Even away from public roads, OSRAM can offer solutions for the most unusual requirements.

OSRAM special OFF-ROAD lamps

Stay flexible away from public roads. Rally lamps¹⁾ from OSRAM offer excellent reliability and brightness even on the most difficult terrain. For design-conscious OFF-ROAD drivers, OSRAM offers the 5,000 K COOL BLUE® HYPER lamps. These lamps are not approved for use on public roads however. Use on public roads leads to cancellation of the operating license and to loss of insurance coverage¹⁾. To make OFF-ROAD vehicles more versatile, OSRAM offers the NIGHT BREAKER® PLUS family of lamps or COOL BLUE® INTENSE for bluish lamps as approved high-brightness alternatives.

High-performance halogen headlight lamps¹⁾ and their alternatives

- Wide range of applications: rescue services, construction and transport work, agriculture and forestry
- For the design-conscious OFF-ROAD driver
- Not approved for use on public roads
- Approved alternatives: NIGHT BREAKER® PLUS and COOL BLUE® INTENSE families of lamps in the 12V sector and OSRAM TRUCKSTAR® PRO in the 24V sector

High performance headlamps for rallye and professional use¹⁾ – product range

This means that they cannot be fitted in "normal" headlights or additional headlights if the vehicle is to be used on public highways. I OFF-ROAD only. I Not for use on public roads

2) 2600 lm | Allgemein: Im Geltungsbereich der StVZO

3) Generally on normal roads

OSRAM MINIBOX

Mobile lamp replacement

Defects in an automobile usually make themselves known on long journeys. The OSRAM MINIBOX saves you the trouble of searching for a suitable workshop to purchase replacement lamps. You can therefore easily fix the problem yourself.

Always fully equipped

It is a statutory requirement in the following countries that spare lamps must be carried: With a spare lamp kit from OSRAM, you will always have the right lamps for your vehicle. The label tells you what the kit contains, together with technical data. The picture on the back shows which lamp should go where. The MINIBOX has an ergonomic shape and exclusive design.

Perfectly-equipped with a mobile reserve

- With the lamp kit, you will always have the right spare lamps to hand
- Easy replacement by the roadside
- Easy identification through clear labeling and application illustration

Spare lamps - mandatory in several countries:

Mandatory:

- | | |
|-------------|--------------|
| • Macedonia | • Montenegro |
| • Serbia | • Spain |

Requirement except for xenon lights and LED:

- | | |
|-----------|----------|
| • Croatia | • Russia |
|-----------|----------|

Recommended:

- | | |
|------------------|------------|
| • France | • Norway |
| • Portugal | • Slovenia |
| • Czech Republic | • Hungary |

OSRAM Spare lamp kit 24V Reserve light for trucks and buses

Professional truck drivers in particular rely on spare lamp kits from OSRAM. They can be used to repair faults without assistance or major work, wherever required.

Always fully equipped

Drivers who always have the right spare lamps with them will save themselves the trouble of taking their vehicles into a garage for replacements. The savings in time and money are considerable, especially on journeys abroad.

Perfectly-equipped with a mobile reserve

- With the spare lamp kits, you've always got the right spare lamps to hand

OSRAM Shelf Rack

Lamp store for workshops and POS

The particularly clear and easy-to-use Shelf Rack offers space for the most important passenger car or truck lamps from OSRAM, and each has a corresponding, attractive label top.

Practical working aid and successful sales promoter

Depending on its location, the OSRAM Shelf Rack ensures that working in the workshop is easier or that customers notice the OSRAM 12 V or 24 V range of lamps for passenger cars more quickly at the POS. Thanks to its modular design, the extremely stable, high-quality shelf can be installed, stocked and also expanded quickly and flexibly.

Extremely practical and particularly attractive

- With drawers and EAN labels
- Row of hooks for presenting blister packs, DUO BOXES, new products
- Ideal for workshops and filling stations, practical for everyday use
- High-quality material and eye-catching design, ideal OSRAM in-store placement

OSRAM – a partner for retailers

For consumers, the name of OSRAM has always stood for expertise in automotive lighting combined with an innovative range of lamps. OSRAM also supports retailers with effective marketing strategies and excellent sales logistics. Business partners therefore have the perfect basis for increasing their sales and customer satisfaction.

A unified approach

As part of its holistic approach to marketing, OSRAM provides the trade sector, shops and workshops with a large number of tools to ensure the best possible support, attractive presentation and greater incentive to purchase. In addition, OSRAM makes use of continuous advertising campaigns, radio advertising and e-marketing activities in the end customer advertising sector.

OSRAM self-service range

The new packaging for the self-service range is not only stylish, it is also consumer-friendly, informative and eco-friendly. Language-neutral pictograms provide consumers with information on product characteristics that is easy to understand.

Displays and secondary placement

Customers can find precisely what they want here. The impressive, high-quality displays and secondary placements present products in a clear way with clear information. The counter displays take up little space but are eye-catching and practical. The floor display provides space for a wide range of products.

Perfect product presentation

Your requirements in the sales room are as unique as our solutions. The “beamer rack” for example is an impressive way of showing customers the difference between OSRAM NIGHT BREAKER® PLUS, OSRAM COOL BLUE® INTENSE and OSRAM ORIGINAL. There are also informative decoration materials such as wobblers and shelf stoppers that immediately catch the eye.

Automotive lamp cabinet and application list

The automotive lamp cabinet from OSRAM is a practical lamp depot for retail outlets, filling stations and workshops. It can be stocked to suit its location. OSRAM provides an application list for workshops so the right lamps can be selected for each vehicle.

Individually tailored

To give trade partners an opportunity to raise their profiles among workshops, OSRAM runs individual campaigns that address specific customer needs. OSRAM also supports its partners with end consumer activities and exclusive product campaigns. In this regard, OSRAM participates as the official partner in the nationwide German "Light Test" campaign run by the German Association for Motor Trades and Repairs.

A love of detail

Additionally, OSRAM makes all article data available for electronic ordering under TecCom and TecDoc. We can set

up classic EDI networks on request. Our ordering system also supports the CAP message standard. For further information about OSRAM, go to www.osram.com or the e-business platform at www.myosram.com where you can also place orders easily and directly. Contact OSRAM for further information.

You can rely on us

For OSRAM, being a partner for retailers is not an empty slogan, it is a genuine maxim backed by a wide range of activities and campaigns. In OSRAM, retailers have a partner they can rely on at all times.

Product presentation and demonstrations breathe new life into your automotive lamp business

Stimulate attention, awaken interest, promote sales: modern POS tools make the innovative OSRAM Automotive product range especially attractive, allowing successful presentation and demonstration.

Clearly spectacular, simply illuminating

Customers can test and compare the special strengths of OSRAM products at the POS and receive useful, convincing

information – and find the products they are looking for quickly and easily.

OSRAM Light Performance Boxes

Impressive light strength comparison: Your best sales' argument is to experience quality live.

"Xenon" version:

Comparison of XENARC® ORIGINAL with XENARC® COOL BLUE® INTENSE or XENARC® SILVERSTAR®.

"Halogen" version:

Comparison of OSRAM ORIGINAL with COOL BLUE® INTENSE or NIGHT BREAKER® PLUS.

Dimensions (W x H x D): 40 x 33 x 25 cm

LED Retrofits Display

Compares conventional lamps for interior lighting¹⁾ with the new LED Retrofits with 4000 K and 6000 K.

Dimensions (W x H x D): 20 x 30 x 9 cm

LED daytime running light display

Shows the effect of LED daytime running lights when switched on.

Dimensions (W x H x D): 20 x 17 x 11 cm

LCD displays

Active consumer communication: information, advice and entertainment at the point of sale. Combined with the high attention value of modern multimedia technology Ideal for secondary placement.

The LCD monitor is available in two versions:

- A compact version for installation in shelving
- An eye-catching version for attaching to a ceiling

LCD monitor for installation in shelving
Dimensions (W x H x D) 7 inches:

34.5 x 16.5 x 8.5 cm.

Dimensions (W x H x D) 10.2 inches:
40 x 30.5 x 14 cm.

LCD monitor for
attaching to a ceiling
Dimensions (W x H x D):
43.5 x 61 x 4 cm.

OSRAM polePOSITION® AM shelf

Consumer-friendly, greater flexibility and higher profits

Clearly structured, easily accessible and extremely convenient presentation system Clear design and clear communication Your customers can find the information and lamps they require quickly.

Test and buy

The integrated beamer rack in the center of the shelf enables customers to test OSRAM NIGHT BREAKER® PLUS, OSRAM COOL BLUE® INTENSE and OSRAM ORIGINAL lamps directly at the POS.

As you like it. Tailor-made shelf system

Every shop is different and every location follows its own rules. The OSRAM polePOSITION® shelf system offers a professional solution that is highly versatile and can be adapted to suit your particular space requirements.

Ask your OSRAM representative.

1) Only approved for use in interiors or off-road

Whether it's a blister pack, a double blister pack or a DUO BOX, the strong appearance of the new OSRAM designs has a twofold effect: eye-catching from a distance and persuasive information when seen up close.

The tried and tested blue background color offers a high level of brand recognition.

The ECE reference, voltage and wattage are shown boldly and clearly at the top left as important search criteria.

The name of the product family is shown boldly and clearly on the left-hand edge.

Product characteristics emphasize the added value of a particular lamp.

Bulb shape and base are clearly visible.

Protective effect – the blister offers excellent protection for the lamp.

Instant recognition of the product benefits.

Gleaming silver particles underline the high-quality design of our trademark-protected packaging.

Even more information at second glance

Type and order reference.

Reminder: "Always replace in pairs".

NEW: The added value of the appropriate lamp compared to the standard product is explained in pictograms - comparison of luminous intensity, beam length, light color and service life.

Quality indicator – original spare part in OEM quality.

Reminder: "Made in Germany".

Application notes and safety information.

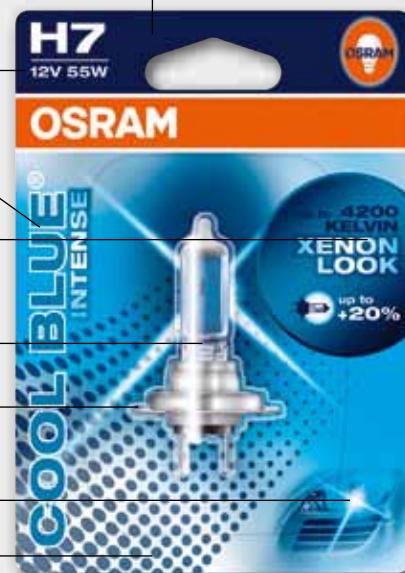

Prominent brand placement

The picture logo

One of the oldest trademarks in Germany stands for premium quality.

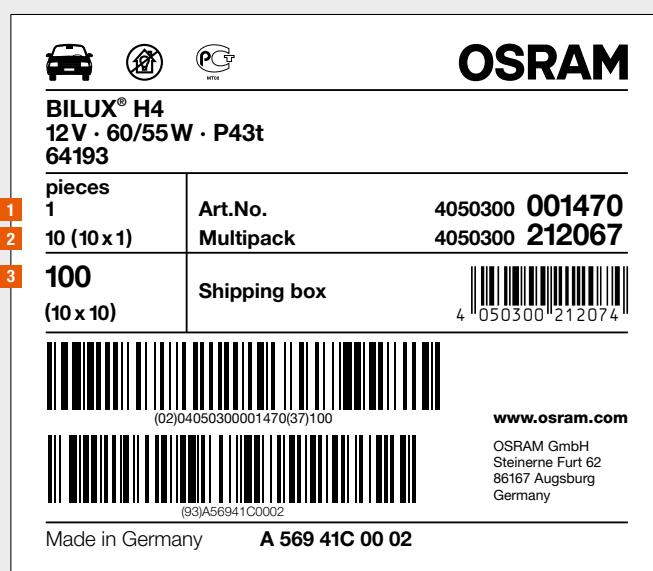

The band

The orange band – as a seal of quality, it is placed prominently at the top of the packaging. It indicates the brand promise and ensures instant recognition.

Ordering by EAN code

The EAN code defines a set of unique international product numbers and is managed by an independent organization. Thanks to its worldwide use and high level of acceptance, it is ideal for identifying products and makes ordering convenient. The product number is used to order a particular consumer unit, so it basically corresponds to the old order number.

- 1** Product number = 1 lamp in folded box or 1 blister
- 2** Multipack = 10 FBs (folded boxes)
- 3** Shipping box = 100 FBs (folded boxes)

How many lamps do you order with the product number?

Product number (consumer unit)
corresponds to 1 folded box with 1 lamp

Product number (consumer unit)
corresponds to 1 lamp (multipack
contains 10 lamps)

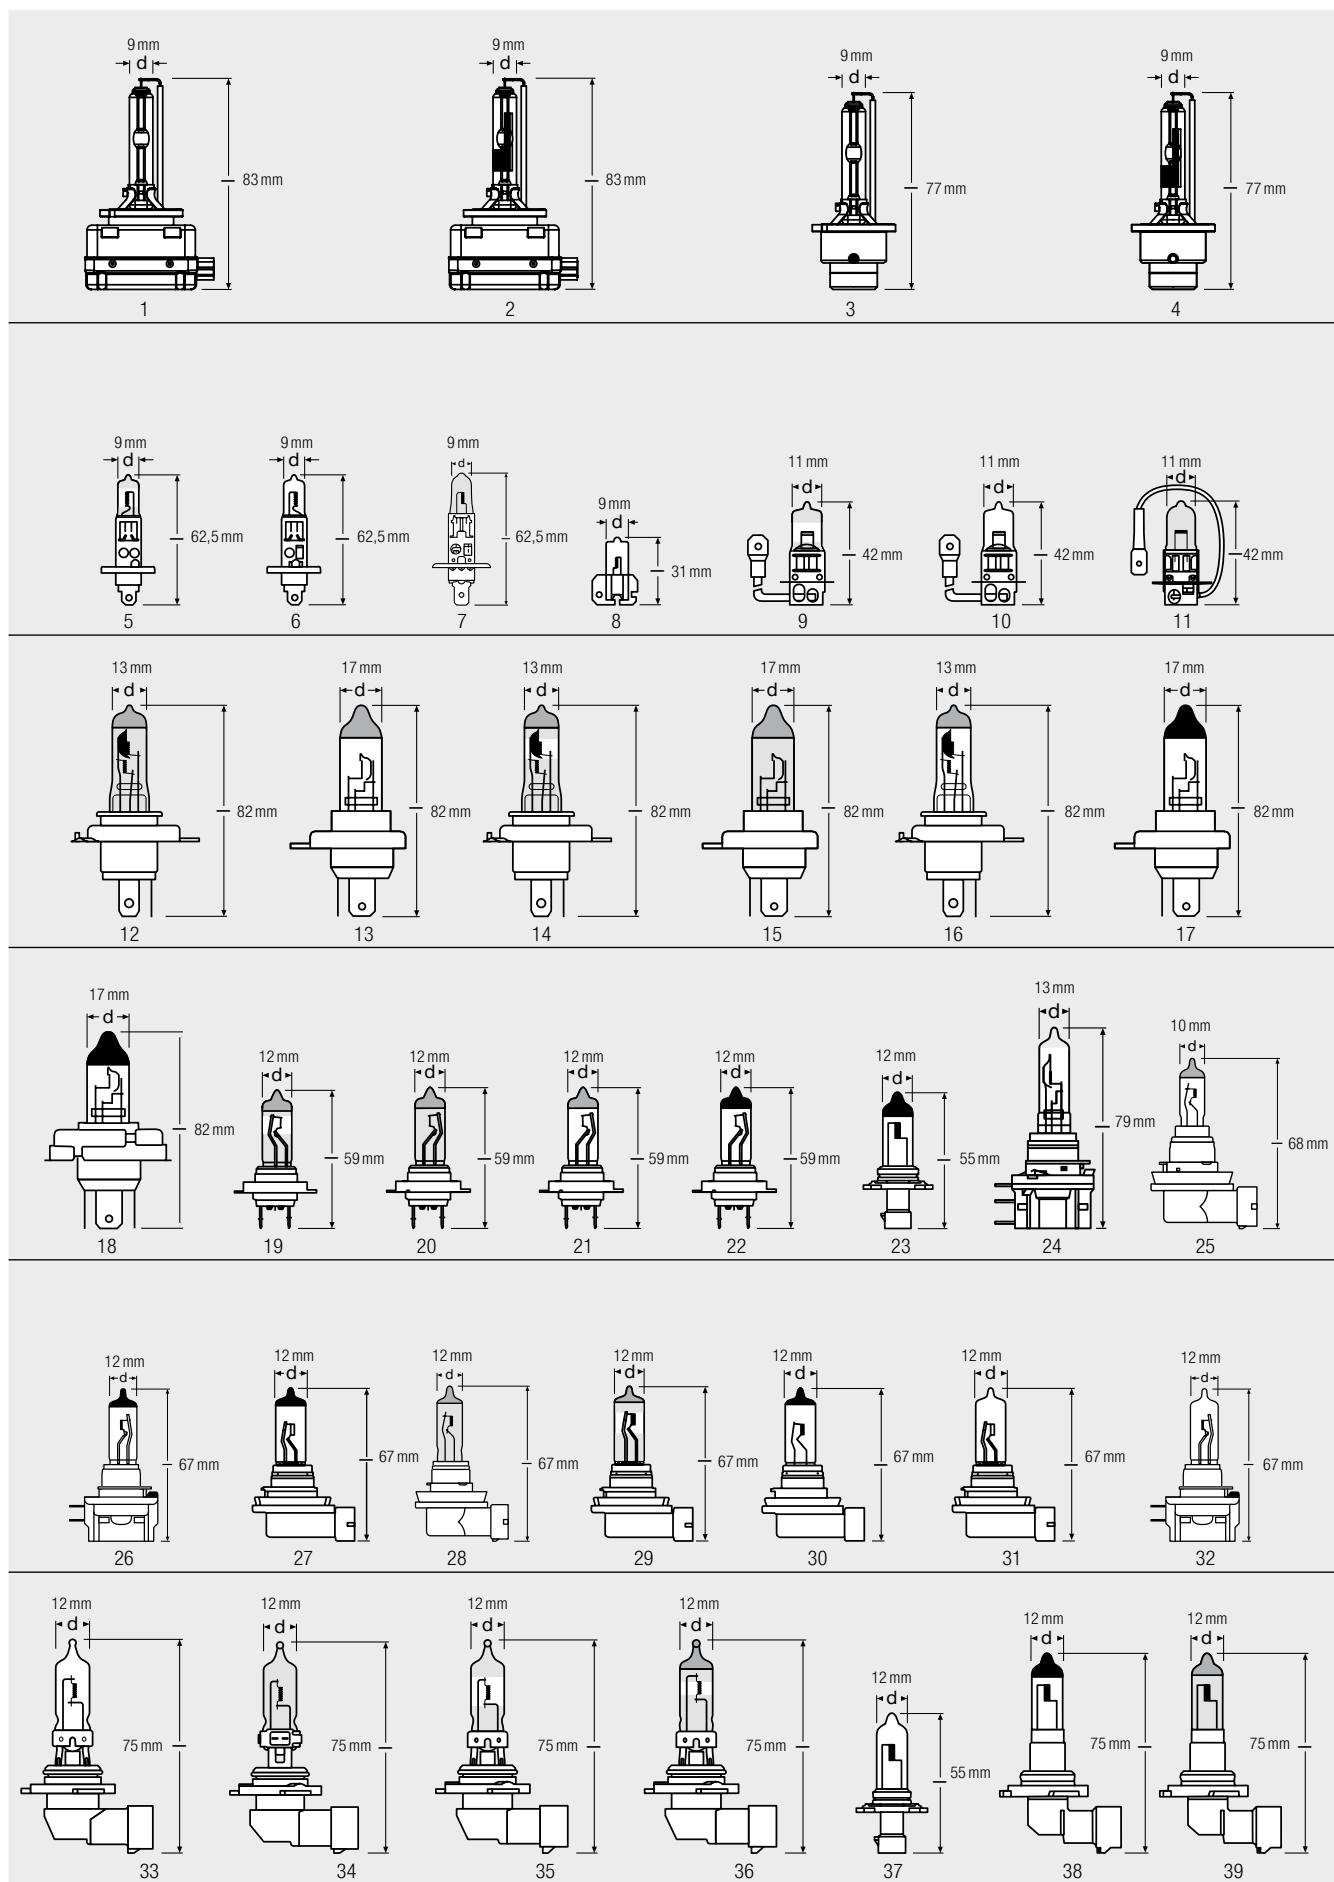

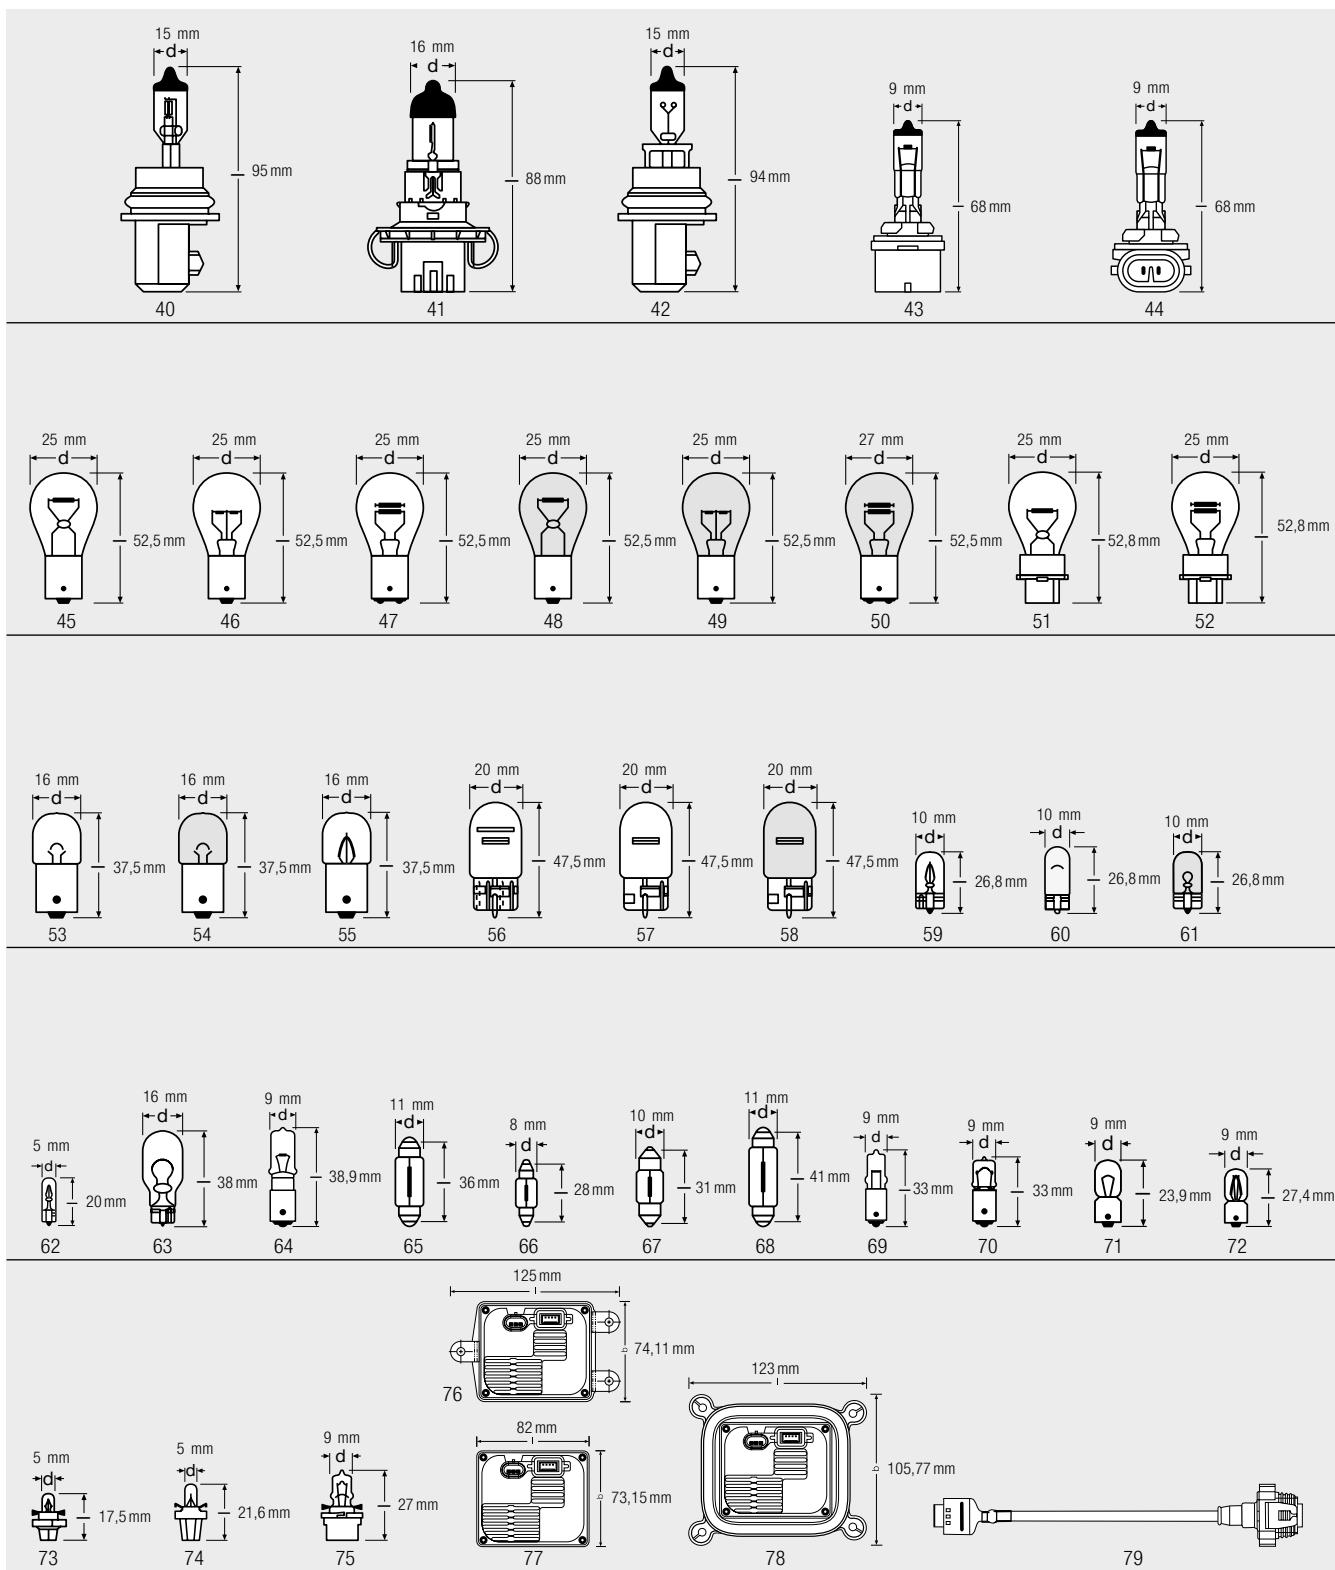

Product number (consumer unit)
corresponds to 1 blister with 1 lamp

Product number (consumer unit)
corresponds to 1 blister with 2 lamps

- 1) Reduced UV emission | For projection headlights | ECE approval and DOT label
- 2) Reduced UV emission | With anti-glare strip for reflection headlights | ECE approval and DOT label
- 3) Amber lamps for clear indicators
- 4) Also available with glass base (article reference 6411150 or 6411350)
- 5) Lamps comply with ECE R 37 and SAE (DOT) regulations
- 6) Red lamp for clear reversing/brake lights
- 7) Successor to the BILUX® AS® lamp (article reference 7951)
- 8) Lamps comply with ECE R 37 and SAE (DOT) regulations | With silver cap
- 9) With silver cap

- 10) To be operated only with approved electronic control gear
- 11) 2600 lm | Generally on normal roads
- 12) Generally on normal roads
- 13) New development for simple lamp replacement and highly efficient headlights; supplied on request
- 14) These products do not have ECE approval. This means that they cannot be fitted in "normal" headlights or additional headlights if the vehicle is to be used on public highways. | OFF-ROAD only. | Not for use on public roads
- 15) Only approved for use in interiors or off-road

- 1) Reduced UV emission | For projection headlights | ECE approval and DOT label
 2) Reduced UV emission | With anti-glare strip for reflection headlights | ECE approval and DOT label
 3) Amber lamps for clear indicators
 4) Also available with glass base (article reference 6411150 or 6411350)
 5) Lamps comply with ECE R 37 and SAE (DOT) regulations
 6) Red lamp for clear reversing/brake lights
 7) Successor to the BILUX® AS® lamp (article reference 7951)
 8) Lamps comply with ECE R 37 and SAE (DOT) regulations | With silver cap
 9) With silver cap

- 10) To be operated only with approved electronic control gear
 11) 2600 lm | Generally on normal roads
 12) Generally on normal roads
 13) New development for simple lamp replacement and highly efficient headlights; supplied on request
 14) SAE category reference. H4 with strict geometrical tolerances
 15) These products do not have ECE approval. This means that they cannot be fitted in "normal" headlights or additional headlights if the vehicle is to be used on public highways. I OFF-ROAD only. I Not for use on public roads
 16) Only approved for use in interiors or off-road

Type overview in numerical order of product reference with test data

- 1) Reduced UV emission | For projection headlights | ECE approval and DOT label
 2) Reduced UV emission | With anti-glare strip for reflection headlights | ECE approval and DOT label
 3) Amber lamps for clear indicators
 4) Also available with glass base (article reference 6411150 or 6411350)
 5) Lamps comply with ECE R 37 and SAE (DOT) regulations
 6) Red lamp for clear reversing/brake lights
 7) Successor to the BILUX® AS® lamp (article reference 7951)
 8) Lamps comply with ECE R 37 and SAE (DOT) regulations | With silver cap
 9) With silver cap
 10) To be operated only with approved electronic control gear
 11) 2600 lm | Generally on normal roads

20) What do B₃ and T_c mean in connection with the service life of bulbs?

If we consider the service lives of products that are designed to last a certain time, we can see that they all have the same or similar failure characteristics.

If we plot the service lives of the individual bulbs on special logarithmic graph paper, the graph produced is called a "Weibull distribution curve".

In a stable production process we obtain a straight line for the service life on which we can read off various life values. For its products in the automotive sector OSRAM specifies a B₃ value, which indicates the time at which 3 % of the tested bulbs have failed. OSRAM also specifies the T_c value (characteristic Weibull value), which indicates the time at which 63.2 % of the bulbs have failed. In former times only the average value was specified (the average life), which in this system would correspond to a B₅₀ value (i.e. the time at which 50 % of the bulbs have failed). By specifying both the B₃ value and the T_c value it is possible to get an idea of the spread of the product's service life and hence the quality of the product.

Explanation: 1-filament lamp e.g. 100/300
 2-filament lamp e.g. 100/300/500/100

B₃ T_c

12) Generally on normal roads

13) New development for simple lamp replacement and highly efficient headlights; supplied on request

14) SAE category reference. H4 with strict geometrical tolerances

15) B₅₀ = average lifespan

Explanation: 1-filament lamp e.g. 100

2-filament lamp e.g. 100/300

16) For operating an OSRAM D1 XENARC® electronic 35 W gas discharge lamp

17) For operating an OSRAM D3 XENARC® electronic 35 W gas discharge lamp

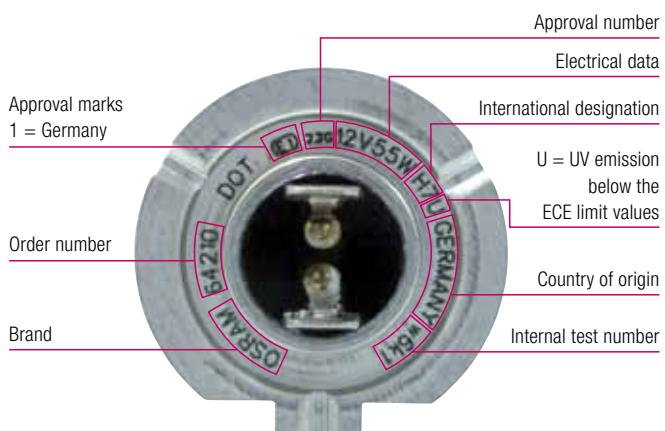

18) These products do not have ECE approval. This means that they cannot be fitted in "normal" headlights or additional headlights if the vehicle is to be used on public highways. I OFF-ROAD only. I Not for use on public roads

19) Only approved for use in interiors or off-road

Symbols

ECE	Int. category label ECE
Lampe	Connector code (lamp side)
EVG	Connector code (ECG side)
W	Rated wattage in watts
V	Voltage in volts
lm	Luminous flux in lumen
K	Color temperature in K
°C min-max.	Temperature range
Base	
Fig. no.	
b [mm]	Width b in mm
h [mm]	Height h in mm
l [mm]	Length l in mm
Shipping unit	

Base stamp

The most important data on an OSRAM H7 lamp.

Hinweise zur Produktkennzeichnung

Do not touch the glass bulb; hold the base when inserting	Do not throw away with household waste
High levels of UV radiation	Switch off lights before replacing lamp
Electronic control gear should be installed and maintained only by qualified specialists	Ignition procedure for lamps with external igniter
Caution: hot	Lamp cannot be dimmed
Dangerous voltage	Wear suitable gloves when fitting or removing
Do not use the lamp if the glass bulb is scratched or damaged	Protect against splashes
Wear suitable goggles when fitting or removing	Operate only in shielded luminaires
Not for residential lighting

SUMMARY OF TYPES AND APPLICATIONS OF AUTOMOTIVE LAMPS

SUMMARY OF TYPES AND APPLICATIONS OF AUTOMOTIVE LAMPS

● NIGHT BREAKER® PLUS

- Up to 90 % more light on the road¹⁾
- Up to 35 m longer beam of light¹⁾
- Up to 10 % whiter light¹⁾
- Up to 50 % longer life¹⁾ (Extra Lifetime)

○ SILVERSTAR® 2.0

- Up to 60 % more light on the road¹⁾
- Up to 20 m longer light cone¹⁾
- Up to double the service life³⁾

○ SILVERSTAR®

- Up to 50 % more light on the road¹⁾
- Up to 20 m longer light cone¹⁾

● XENARC® SILVERSTAR®

- The most powerful xenon automotive lighting in the world
- Up to 30 % more light than standard xenon lamps and up to 130 % more light than halogen lamps for passenger cars
- Up to 20 m longer light beam.⁴⁾ than standard xenon lamps

● COOL BLUE® INTENSE

- Bright bluish-white light (up to 4,200 Kelvin, similar to light from xenon lamps)
- Up to 20 % more light⁵⁾
- Brighter and therefore easier on the eyes

● XENARC® COOL BLUE® INTENSE

- Considerably greater luminous flux with up to 20 % more light⁶⁾ for perfect road illumination and individual light design
- COOL BLUE® effect through even higher color temperature (5500 Kelvin), clearer outer bulb and thus even light distribution

● ULTRA LIFE

- First branded lamp for passenger cars with 3-year guarantee⁷⁾
- Lasts up to three times longer¹⁾
- Ideally suited as daytime running light
- Perfect for cars with complex lamp changing procedures

● DIADEM®

- Only colored when working
- Interference coating (not painted)
- Color does not fade over time
- Up to double the service life¹⁾
- Discreet blue shimmer when switched-off

● DIADEM® Chrome

- Only colored when working
- Interference coating (not painted)
- Color does not fade over time
- NEW: Almost invisible when switched off

● NIGHT RACER® PLUS

- Up to 90 % more light on the road¹⁾
- Up to 35 m longer light cone¹⁾

○ X-RACER®

- Bright bluish-white light (up to 4,200 Kelvin, similar to light from xenon lamps)
- Up to 20 % more light⁵⁾

● TRUCKSTAR® PRO

- Up to 100 % more light on the road¹⁾
- Up to 2.5x service life⁸⁾
- Greater safety thanks to better illumination of the road

● OSRAM LED Retrofits⁹⁾

- Completely new light effect through a color temperature of up to 6000 K
- Up to 80 % lower power consumption than standard lamps
- Uniform light, no spotty lighting
- Lamp types with high sales' potential: LEDW5W, LEDT4W and LEDC5W (structure corresponds to the halogen variants C5W, W5W and T4W)
- Each in "warm" (4000 K) and "cool" versions (6000 K)
- LED retrofit lamps for numberplate lighting (off-road use)

○ OSRAM LED LIGHT@DAY® daytime running light

- Noticeable design: The curved design makes the vehicle seem more dynamic
- Dual function: Daytime running and position light (optional)
- Up to 6000 Kelvin
- Suitable for many vehicle models, easy installation
- Low power consumption
- Thanks to the high IP 69K protection rating, intensive car washes do not pose a threat to the LED daytime running light
- ECE R87 approval
