## *Dear customer,*

It's our pleasure to introduce our new cooling products catalogue. TYC Europe carries a continuously increasing range of cooling products meeting European specifications.

All radiator applications have OE-comparable configuration, appearance and performance. Their thin and lightweight aluminum tubing and louvered aluminum fins maximize heat transfer capacity to meet OE standards. In-line pressurized leakage testing during our production ensures perfectly sealed systems and maximum reliable service life.

Our cooling fans are delivered as perfectly balanced and ready-to-use assemblies. This ensures a "drop-and-fit" approach, which helps you saving time and money for you and your customers. In case the typical front-end vehicle structure does not allow supplying complete assemblies we supply our fans as "sub-assemblies". Nevertheless, we will include all additional small components, such as electronic speed control units, fixation parts and rubber gaskets.

All our fans are designed and built to meet OE requirements. Their performance in air replacement, power consumption, noise level, vibrations and fitment meet the toughest standards, and each unit is tested, balanced and approved before they leave our factory. Further on, our fans meet E-Mark regulation, assuring maximum shielding properties against electro-magnetic interference. Finally, TYC is the only cooling fan supplier that offers a limited lifetime warranty!

This catalogue represents the product range according to the status of spring 2011. Items under development are indicated "TBA" (to be available). New available items are announced monthly via our "New Product Announcement". Every NPA is also downloadable from our website.

Besides this paper catalog our product information is carefully and continuously updated in the E-catalog on our website ([www.tyceurope.com](http://www.tyceurope.com)). Also, being a "Certified Data Supplier" for TecDoc our team gives top-priority and full attention to keeping our product information accurate and actual.

We thank you for your interest in TYC products. We hope that you will find this catalogue a great added value in conducting your business. Should you have any questions regarding our products, please do not hesitate to contact us.

With best regards,

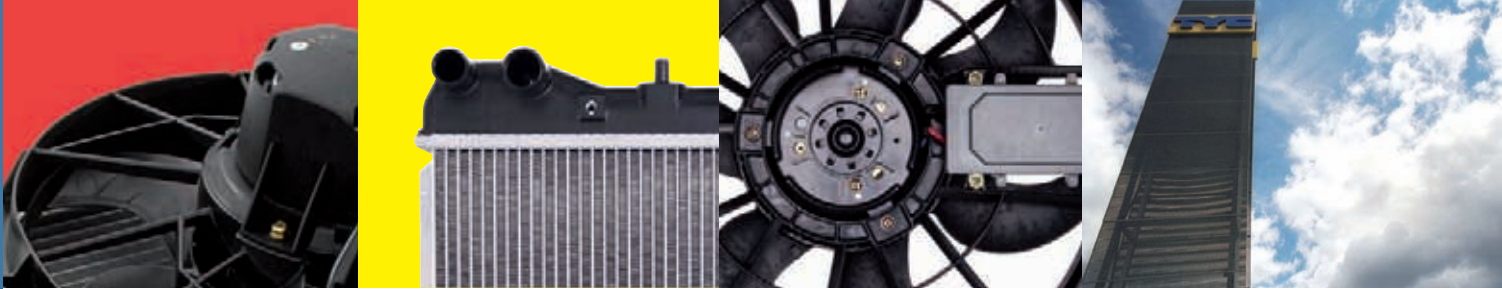

TYC Europe team

*Radiator*

*Cooling Fan*

## ***TYC cooling products: The brightest choice***

TYC cooling products are covering a wide range of popular car models. Our range grows rapidly for the cooling fan and radiator product line. For cooling fans TYC added more than 50 new items with numerous new vehicle references and the radiator range has been extended with 10 new items to fit many light commercial vehicles.

The products have a correct balance in quality and price level and using this catalog there are easy to find for the right vehicle application. Many different markets within Europe with different climates, vehicle usage and driving conditions ask for many different vehicle specifications. Additionally, local trim levels, engine types and cooling specifications multiply the number of options to choose from. Therefore we designed this catalog to avoid wrong ordering as much as possible.

### **How to read this catalogue**

Our aim is to make your search for the right product as easy as possible. Each product line (Radiator and Cooling Fans) has his own part in the catalog and you can find the correct product in three different ways:

1. By vehicle information
2. By TYC number
3. By original number

After finding the TYC reference check for the correct choice the product drawing chapter to check geometries and additional specific information. These pictures are most important to make your choice and must be checked and compared with the original product that is to be replaced, before ordering. For the different chapters in our catalog we give a brief explanation.

### **1. Product application table by vehicle make and model**

These tables allow lookup to find the correct TYC item number. Detailed product information is included. We grouped vehicle data (such as engine codes) as much as possible to simplify your search.

### **2. Reference table TYC**

This table allows you to find all linked OE numbers based on the TYC product number. You can find most used replaced OE-numbers, as well as all the component numbers used (in case of some cooling fans). Additionally, the page number is shown where to find the product drawing with the brief information overview.

### **3. Cross reference tables OE**

These tables help to find our products based on OE numbers. In case of a cooling fan assembly, it's common that only 1 OE number is known, for example the shroud or the blade. This table therefore also shows what kind of product the OE number refers to.

**NEW: head lamp leveling motors!**

## Your most cost effective quality choice

As a worldwide recognized Tier 1 OEM supplier TYC also develops and produces high value quality products for the independent after market. TYC head lamps, fog lamps, tail lamps, door mirrors, cooling fans and radiators all meet the OEM standards and carry E-mark certifications as independently approved by TÜV-Rheinland.
