VDO

The Company

Alongside our many specialised solutions for automotive manufacturers, we also offer comprehensive solutions and services for the aftermarket. Spare parts of matching quality, supplied with the experience and proven expertise of an OEM supplier are a particular strength. Our comprehensive range of spare parts of matching quality is readily available and is synonymous with a perfect fit, simple installation and consistently reliable quality, offering significant advantages for distributors, workshops and consumers alike.

Das Unternehmen

Neben unseren speziellen und vielfältigen Lösungen für Automobilhersteller bieten wir umfassende Lösungen und Serviceaktivitäten für den Aftermarket. Hierzu zählen insbesondere qualitativ gleichwertige Ersatzteile, die wir mit dem Wissen und der langjährigen Kompetenz eines Erstausrüsters anbieten. Das umfassende und zeitnah verfügbare Leistungsspektrum an Ersatzteilen steht für Passgenauigkeit, einen einfachen Einbau sowie gleichbleibende Qualität. So bieten qualitativ gleichwertige Ersatzteile Großhändlern, Werkstätten und Endkunden gleichermaßen deutliche Vorteile.

L'entreprise

Parallèlement à nos solutions particulières et multiples pour les constructeurs automobile nous offrons des solutions et des activités de service étendues pour l'Aftermarket (marché de pièces de rechange et d'accessoires). En font partie en particulier les pièces détachées qualitativement équivalentes que nous proposons avec le savoir et la compétence de longue durée d'un premier équipementier de série. La gamme étendue de fournitures, disponibles à brève échéance, de pièces détachées représente la précision de l'assemblage, un montage simple ainsi qu'une qualité constante. Ainsi les pièces détachées qualitativement équivalentes offrent des avantages nets de la même manière aux grossistes, aux garages et aux clients finaux.

Nuestra empresa

Además de las soluciones especiales y variadas que producimos para fabricantes de automóviles, ofrecemos numerosas soluciones y actividades de servicio para el mercado postventa. Entre éstas destacan en particular los recambios de calidad equivalente, que ofrecemos al mercado con los conocimientos y el nivel de competencia, forjados durante muchos años, de un fabricante de primeros equipos. Nuestro amplísimo espectro de recambios, disponibles al poco tiempo de aparecer en cada modelo de automóvil, se caracterizan por su precisión de ajuste, su montaje sencillo y su calidad constante. Por ello, los recambios de calidad equivalente suponen por igual claras ventajas para mayoristas, talleres y clientes finales.

La società

Oltre a numerose soluzioni specializzate per i produttori di automobili offriamo soluzioni e servizi ad ampio spettro per il settore aftermarket (pezzi di ricambio e accessori). Tra questi rientrano in particolare pezzi di ricambio qualitativamente equivalenti che offriamo con il know-how e l'esperienza pluriennale di un fornitore OEM. La vasta gamma di pezzi di ricambio rapidamente disponibili rappresenta una soluzione ottimale, facilmente installabile e di qualità costante. I pezzi di ricambio qualitativamente equivalenti offrono pertanto ai distributori, alle officine e ai clienti finali notevoli vantaggi.

Компания

Помимо узкоспециальных и широкопрофильных решений для автопроизводителей мы готовы предложить комплексные решения, включая набор сервисных операций, для послепродажного обслуживания автомобилей. В частности, по качеству равноценные оригинальным запасные части, которые мы, как предприятие-изготовитель, предлагаем партнерам на базе наших знаний и многолетнего опыта. С учетом широкого спектра услуг и возможности поставок в кратчайшие сроки гарантирована точность изготовления изделий, простой монтаж и стабильное качество производства. Поэтому приобретая по качеству равноценные оригинальным запасные части у нас, оптовые покупатели, промышленные предприятия и конечные пользователи в одинаковой степени получают очевидные преимущества.

Engine actuators: the perfect balance

A full tank of fuel isn't enough on its own to drive a vehicle. The fuel has to be prepared correctly for combustion, i.e. mixed with air and the fuel/air mix then fed into the engine's combustion chamber. The engine management system features various actuators that work together to ensure optimum combustion at all times. Regardless of the changed engine load status (switching on the air conditioning or other electrical consumers), these deliver a constant idling speed.

Motorstullelemente: Die Mischung macht's

Ein voller Tank allein genügt nicht, um ein Fahrzeug anzutreiben. Der Kraftstoff muss auch für die Verbrennung entsprechend vorbereitet, d.h. mit Luft gemischt werden. Das Kraftstoff-Luft-Gemisch wird dann in den Brennraum des Motors geleitet. Für die zu jedem Zeitpunkt optimale Verbrennung sorgen verschiedene miteinander verbundene Stellenelemente im Motormanagement. Diese regeln, unabhängig vom veränderten Lastzustand des Motors (Einschalten der Klimaanlage oder von anderen elektrischen Verbrauchern) eine konstante Leerlaufdrehzahl.

Commandes moteur : Le mélange est important

Un réservoir seulement rempli ne suffit pas pour propulser une voiture. Le carburant doit aussi être préparé pour la combustion de manière correspondante, c'est-à-dire mélangé avec de l'air. Ensuite le mélange carburant/air est transféré dans la chambre de combustion du moteur. Différents éléments de commande, reliés entre eux, dans la gestion du moteur veillent à une combustion toujours optimale. Ceux-ci règlent un nombre de tours en marche à vide constant, indépendamment de l'état de charge modifié du moteur (mise en marche de la climatisation ou d'autres consommateurs électriques).

Actuadores de motor: en la mezcla está la gracia

Un depósito lleno no basta para propulsar un vehículo. Para lograrlo, el carburante debe prepararse de manera acorde para la combustión, es decir, debe mezclarse con aire. A continuación, la mezcla carburante-aire se canaliza hacia la cámara de combustión del motor. La combustión óptima en cada momento queda asegurada por distintos actuadores comunicados entre sí en el sistema de gestión del motor. Éstos regulan la velocidad de ralentí a un valor constante, independientemente de si varía el estado de carga del motor (conexión del climatizador o de otros consumidores eléctricos).

Elementi di regolazione del motore: la miscela è fondamentale

Un serbatoio pieno da solo non è sufficiente ad azionare un veicolo. Il carburante deve anche essere preparato adeguatamente per la combustione, in altre parole miscelato con l'aria. La miscela carburante-aria viene condotta nella camera di combustione del motore. Vari elementi di regolazione collegati l'uno all'altro garantiscono la combustione ottimale in ogni momento nella gestione del motore. Questi regolano un numero di giri a vuoto costante, indipendentemente dal carico del motore (attivazione dell'impianto di climatizzazione o di altre utenze elettriche).

Исполнительные элементы приводов. Все решает качество смеси

Полный бак горючего еще не гарантия, что автомобиль поедет. Топливо необходимо подготовить для сжигания, т.е. смешать с воздухом. Топливовоздушная смесь подается затем в камеру сгорания двигателя. Оптимальное сгорание смеси в любой момент времени обеспечено взаимодействием различных исполнительных элементов системы управления двигателем. Указанные элементы призваны обеспечить постоянное количество оборотов холостого хода вне зависимости от режима нагрузки двигателя (включение кондиционера или иных электропотребителей).

Electromotive throttle valves

In this type of throttle, the butterfly valve is mechanically linked to the accelerator pedal. The angle of the valve is monitored by the throttle electronics, which remain in constant communication with the engine management system. The resulting data is compared in real time with a range of information from other onboard sensors. The engine management system calculates the optimum throttle position in terms of both fuel economy and emissions. This information is then fed back to the throttle electronics, which adjust the throttle angle as required.

Elektromotorische Drosselklappen

Die Drosselklappenstellung wird mechanisch über den Gaszug reguliert und von der Drosselklappen-Elektronik als Steuersignal an das Motorsteuergerät weitergeleitet. Die eingehenden Informationen werden mit weiteren aktuellen Informationen aus verschiedenen Sensoren des Motormanagements abgeglichen. Die für Verbrauch und Abgasemission optimale Drosselklappenstellung wird permanent errechnet und angeglichen und in Form eines Steuersignals an die Drosselklappe zurück gesendet. Dort wird eine Feinregulierung der Drosselklappenstellung eingeleitet.

Corps papillon compact

Ici, le papillon est relié à la pédale d'accélérateur au moyen d'une liaison mécanique. L'angle de soupape est contrôlé par l'électronique du papillon, qui reste en communication permanente avec le système de commande du moteur. Les données qui en résultent sont comparées en temps réel avec un ensemble d'informations provenant d'autres capteurs embarqués. Le système de commande du moteur calcule alors la position optimale du système au niveau des économies de carburant et des émissions. Ces informations sont ensuite renvoyées à l'électronique du papillon, qui ajuste l'inclinaison en conséquence.

Válvulas del acelerador con control electromotriz

En este tipo de acelerador, la válvula de mariposa está conectada de forma mecánica al pedal. La electrónica del acelerador observa el ángulo de la válvula y lo comunica al sistema de gestión del motor. Estos datos se comparan en tiempo real con la información procedente de otros sensores de a bordo y se calcula la mejor posición del acelerador para optimizar las emisiones y el consumo de combustible. Esta información se devuelve a la electrónica del acelerador que corrige el ángulo del acelerador según sea necesario.

Valvole a farfalla elettromeccaniche

In questo caso, la valvola a farfalla è collegata meccanicamente al pedale dell'acceleratore. L'angolo di apertura della valvola è controllato dai componenti elettronici della stessa, che rimangono in comunicazione costante con il sistema di gestione del motore. I dati ottenuti vengono confrontati in tempo reale con una serie di informazioni provenienti da altri sensori di bordo. Il sistema di gestione del motore calcola la posizione ottimale della valvola in termini sia di risparmio di carburante sia di emissioni. Queste informazioni vengono poi rinviate ai componenti elettronici della valvola che ne regolano l'apertura di conseguenza.

Дроссельные заслонки с электромоторным приводом

Положение дроссельной заслонки регулируется механически с помощью троса управления, при этом электронные датчики дроссельных заслонок посылают сигнал на блок управления двигателем. В процессе обработки поступающих сигналов выполняется их сравнение с другой параметрической информацией, полученной от различных датчиков системы управления двигателем. Непрерывно осуществляется расчет и корректировка оптимального с точки зрения расхода топлива и выброса выхлопных газов положения дроссельных заслонок, управляющий сигнал поступает к дроссельной заслонке. Здесь устанавливается оптимальное положение дроссельной заслонки.

Electronic throttle valves

The electronic accelerator's pulse and all other available data from the engine management system's sensors are permanently calibrated. The optimum throttle valve position is calculated from this information. The electronic throttle valve is only activated by the control signal from the engine management system.

Elektronische Drosselklappen

Der Impuls des elektronischen Gaspedals (E-Gas) und alle weiteren zur Verfügung stehenden Daten der Motormanagement-Sensorik werden permanent abgeglichen. Hieraus wird die jeweils optimale Drosselklappenstellung errechnet. Die elektronische Drosselklappe wird dabei ausschließlich durch das Steuersignal aus dem Motormanagement angesteuert.

Clapets d'étranglement électroniques

L'impulsion de la pédale d'accélérateur électronique et toutes les autres données disponibles de la sensorique de la gestion du moteur sont alignées en permanence. On calcule en permanence la position optimale des clapets d'étranglement. Ce faisant le clapet d'étranglement électronique est excité exclusivement par le signal de commande de la gestion du moteur.

Válvulas de mariposa electrónicas

El impulso del pedal electrónico del acelerador (acelerador electrónico) y todos los restantes datos disponibles de los sensores del sistema de gestión del motor se equilibran de manera permanente. A partir de estos datos se calcula la posición óptima de la válvula de mariposa en cada momento. La válvula de mariposa electrónica se controla exclusivamente mediante la señal de control procedente del sistema de gestión del motor.

Valvole a farfalla elettroniche

L'impulso del pedale dell'acceleratore elettronico (E-Gas) e tutti gli altri dati disponibili della sensorica di gestione del motore vengono compensati in modo permanente. In base a questi dati viene calcolata la posizione di volta in volta ottimale delle valvole a farfalla. La valvola a farfalla elettronica viene controllata esclusivamente dal segnale di comando proveniente dalla gestione del motore.

Электронные дроссельные заслонки

Импульс при нажатии педали газа с электронным приводом, а также все имеющиеся параметры сенсорики системы управления двигателем постоянно анализируются. В результате определяется соответствующее оптимальное положение дроссельных заслонок. Управление электронной дроссельной заслонкой осуществляется исключительно на основе сигнала, поступающего от системы управления двигателем.

Idle-speed controllers

Idle speed governors dynamically control the adjustment of intake air in the throttle valve bypass and therefore the engine speed when idling. Working with the sensors and an electronic control unit, they quickly correct variances in speed.

Leerlaufregler

Leerlaufregler steuern die Regelung der Ansaugluft im Drosselklappen-Bypass und damit die Motordrehzahl im Leerlauf dynamisch. In Verbindung mit den Sensoren und einem elektronischen Steuergerät werden Drehzahlabweichungen schnell ausgeglichen.

Régulateurs de ralenti

Les régulateurs de ralenti commandent la régulation de l'air d'entrée dans le by-pass des clapets d'étranglement et ainsi le régime du moteur au ralenti de manière dynamique. Les écarts de régime sont réglés rapidement en combinaison avec les capteurs et un appareil de commande électronique.

Reguladores de ralenti

Los reguladores de ralenti gobiernan la regulación del aire de admisión en el bypass de la válvula de mariposa y, por tanto, controlan de manera dinámica las revoluciones del motor en ralenti. Conjuntamente con los sensores y una unidad de mando electrónica se compensan rápidamente las desviaciones del número de revoluciones del motor.

Dispositivi di regolazione del minimo

I dispositivi di regolazione del minimo regolano in modo dinamico l'aria aspirata nel bypass delle valvole a farfalle e quindi il numero di giri al minimo del motore. In combinazione con i sensori e con un dispositivo di controllo elettronico vengono compensati rapidamente eventuali scostamenti del numero di giri.

Регулятор холостого хода

Регуляторы холостого хода призваны управлять подачей воздуха в байпас дроссельных заслонок, поэтому количество оборотов на холостом ходу поддерживается динамически. Применение датчиков и электронного блока управления позволяет поддерживать количество оборотов холостого хода на заданном уровне.

Digital linear actuators

Digital linear actuators gradually control the adjustment of intake air in the throttle valve bypass and therefore the engine speed when idling. Working with the sensors and an electronic control unit, they quickly correct variances in speed.

Digitale Linearsteller

Digitale Linearsteller steuern die Regelung der Ansaugluft im Drosselklappen-Bypass und damit die Motordrehzahl im Leerlauf schrittweise. In Verbindung mit den Sensoren und einem elektronischen Steuergerät werden Drehzahlabweichungen schnell ausgeregelt.

Actionneurs linéaires numériques

Les régulateurs de ralenti commandent la régulation de l'air d'entrée dans le by-pass des clapets d'étranglement et ainsi le régime du moteur au ralenti par étapes. Les écarts de régime sont réglés rapidement en combinaison avec les capteurs et un appareil de commande électronique.

Actuadores lineales digitales

Los actuadores lineales digitales gobiernan paso a paso la regulación del aire de admisión en el bypass de la válvula de mariposa y, de este modo, las revoluciones del motor en ralentí. Conjuntamente con los sensores y una unidad de mando electrónica se compensan rápidamente las desviaciones del número de revoluciones del motor.

Regolatori lineari digitali

I regolatori lineari digitali regolano in modo graduale l'aria aspirata nel bypass delle valvole a farfalle e quindi il numero di giri al minimo del motore. In combinazione con i sensori e con un dispositivo di controllo elettronico vengono compensati rapidamente eventuali scostamenti del numero di giri.

Цифровой линейный регулятор

Цифровые линейные регуляторы управляют подачей воздуха в байпас дроссельных заслонок, поэтому происходит ступенчатое изменение количества оборотов на холостом ходу. Применение датчиков и электронного блока управления позволяет поддерживать количество оборотов холостого хода на заданном уровне.

Air control valves

In the intake system of diesel engines, our ACVs (with or without integrated control electronics) use an electric motor to restrict the intake air so that a precisely controlled exhaust gas recirculation system is possible (stricter exhaust standards) and to remedy the annoying shake that occurs when shutting down diesel engines.

Luftregelventile

Mit unseren ACV (mit oder ohne integrierte Regelelektronik) wird im Ansaugtrakt von Dieselmotoren elektromotorisch eine Ansaugluftdrosselung vorgenommen, um eine exakt geregelte Abgasrückführung (strengere Abgasnormen) zu realisieren sowie die bei Dieselmotoren störend wirkende Abschalterschüttelfunktion zu beheben.

Clapet d'arrivée d'air

Avec nos ACV (avec ou sans électronique de réglage intégrée) on procède de façon électromotrice à une restriction d'air aspiré dans le circuit d'admission des moteurs diesel pour réaliser un recyclage des gaz d'échappement exactement réglé (normes de rejet plus sévères) ainsi on élimine aussi les secousses moteur au moment de l'arrêt des moteurs diesel, ressenties comme dérangeantes.

Válvula reguladora de aire

Con nuestras válvulas reguladoras de aire ACV (con o sin electrónica de regulación integrada) se estrangula el aire de admisión mediante un motor eléctrico en el conducto de admisión de motores diésel para implementar una recirculación de gases de escape regulada con exactitud (para poder cumplir normas más estrictas sobre emisiones de gases de escape) así como para eliminar la función supresora de sacudidas durante la parada del motor, tan molesta en los motores diésel.

Valvola di regolazione dell'aria

Con il nostro ACV (con o senza sistema elettronico di regolazione integrato) nel tratto di aspirazione dei motori diesel viene effettuata con un motore elettrico una chiusura dell'aria di aspirazione per realizzare un ricircolo del gas di scarico regolato con esattezza (norme sulle emissioni dei gas di scarico più severe) e per eliminare una scorretta funzione di vibrazione nei motori diesel.

Регулирующий воздушный клапан

На базе предлагаемой нами электронной системы ACV (со встроенными регуляторами или без них) во впускном тракте дизельных двигателей объем поступающего воздуха регулируется с помощью электропривода, при этом строго контролируется рециркуляция ОГ (более строгие нормы выбросов ОГ), а также удается предотвратить вибрации от неустойчивой работы дизеля при отключении.

Air flap actuators

The electric actuator with integrated position sensor and optional integrated electronics allows intake manifold throttles or turbo charge guide vanes for example to be continuously adjusted. Its more precise control means that it is taking the place of standard pneumatic drives which can no longer satisfy the more stringent requirements.

Luftklappen-Stellmotoren

Der elektrische Aktuator mit integriertem Positionssensor und wahlweise integrierter Elektronik ermöglicht die kontinuierliche Verstellung beispielsweise von Saugrohrklappen oder Turboladerleitschaufeln und ersetzt aufgrund der präziseren Steuerung herkömmliche pneumatische Antriebe, die den gestiegenen Anforderungen nicht mehr genügen.

Moteur de commande des clapets d'arrivée d'air

L'actionneur électrique avec un capteur de position intégré et au choix une électronique intégrée permet le réglage continu par exemple de clapets de tuyau d'aspiration ou d'aubes directrices de turbocompresseur et remplace, en raison de la commande plus précise, les entraînements pneumatiques traditionnels qui ne suffisent plus aux exigences plus élevées.

Servomotor de válvula de aire

El actuador eléctrico con sensor de posición integrado y electrónica opcionalmente integrada permite la regulación continua de, por ejemplo, las válvulas de múltiples de admisión o de los álabes guía de turboalimentadores y, debido al control más preciso que permite dicho actuador, sustituye a los accionamientos neumáticos convencionales que ya no pueden hacer frente a las actuales exigencias cada vez mayores.

Servomotore delle valvole di chiusura dell'aria

L'attuatore elettrico con sensore di posizione integrato e sistema elettronico integrato a scelta permette la regolazione continua delle valvole del tubo di aspirazione o delle palette di guida del turbocompressore e, grazie al controllo preciso, sostituisce gli attuatori pneumatici che non soddisfano più gli attuali requisiti.

Исполнительный привод воздушных заслонок

Электрический актюатор со встроенным датчиком позиционирования и встраиваемыми электронными компонентами призван обеспечивать постоянное регулирование, например, заслонок впускного коллектора или направляющих лопаток турбокомпрессора, благодаря точности регулирования можно отказаться от обычных пневмоприводов, которые уже не соответствуют возросшим требованиям.

Exhaust gas recirculation valves

Compared with traditional valves, the electrically actuated exhaust recirculation valves enable even more accurate control of the exhaust recirculation rates in Diesel engines and direct-injection gasoline engines. This way they make an important contribution towards meeting ever stricter exhaust emission standards.

Abgasrückführungsventile

Im Vergleich zu herkömmlichen Ventilen ermöglichen elektrisch betätigte Abgasrückführungsventile eine noch genauere Steuerung der Abgasrückführraten in Dieselmotoren und direkt einspritzenden Ottomotoren. So leisten sie einen wichtigen Beitrag zur Erfüllung der immer strenger werdenden Abgasnormen.

Valves de recyclage des gaz d'échappement

Par rapport aux valves conventionnelles, les valves de recyclage des gaz d'échappement à commande électrique permettent un contrôle plus précis des taux de recyclage des gaz d'échappement dans des moteurs diésel et des moteurs à essence à injection directe. Ainsi, elles contribuent fortement au respect des normes antipollution de plus en plus sévères.

Válvulas para la recirculación de gases de escape

Las válvulas de actuación eléctrica para la recirculación de los gases de escape permiten un control todavía más preciso de las tasas de recirculación de gases en los motores de gasóleo y los motores de explosión con inyección directa si se comparan con las válvulas convencionales. En consecuencia contribuyen en gran medida al cumplimiento de las normas cada vez más estrictas para los gases de combustión.

Valvole di ricircolo dei gas esausti

In confronto alle valvole convenzionali, le valvole di ricircolo dei gas esausti a comando elettrico permettono una gestione più precisa dei tassi di ricircolo dei gas combusti dei motori diesel e a benzina ad iniezione diretta, dando un forte contributo al rispetto delle norme sulle emissioni gassose sempre più severe.

Клапаны системы рециркуляции отработавших газов

По сравнению с обычными клапанами клапаны системы рециркуляции отработавших газов с электрическим приводом обеспечивают еще более точное управление долей возврата отработавших газов в дизельных двигателях и бензиновых двигателях с прямым впрыском. Тем самым они вносят важный вклад в соблюдение все более строгих норм выброса выхлопных газов.

Capteurs et moteurs VDO entre autres pour le système Valvetronic

Le système Valvetronic System permet au véhicule de développer plus directement sa puissance tout en l'augmentant, et de réduire jusqu'à 10 % la consommation des moteurs à essence.

Avec ce système, le débit d'admission d'air est régulé par la commande variable de la levée des soupapes, qui remplit ainsi le rôle du papillon. Cependant, le papillon n'est pas supprimé car il assure d'autres fonctions, par exemple le régime de secours.

Les moteurs de haute précision VDO ajustent en continu l'arbre à excentrique dans le système. Les soupapes d'admission sont réglées de manière variable par l'arbre à excentrique et le culbuteur entraîné par l'arbre à cames. Les capteurs VDO surveillent avec précision l'angle de calage de l'arbre à excentrique et transmettent sa valeur à la gestion du moteur.

VDO Sensors and VDO Motors e.g. for the Valvetronic System

With help of the BMW Valvetronic System the vehicle power is more direct and increased. On the other hand the consumption is reduced by up to 10% within the gasoline engine.

Within this system the airflow is controlled by the Variable Valve Lift and replaces the Throttle Valve. Nevertheless, a Throttle Valve is still mounted and responsible for other functionalities like emergency operation.

The high-precision VDO Motors adjust continuously the eccentric shaft of the system. Via the eccentric shaft and the cam shaft driven rocker arm the intake valves are variably adjusted. The VDO Sensors exactly control the adjusted angle of the eccentric shaft and report this value to the engine management.

VDO Sensoren und VDO Motoren u.a. für das Valvetronic System

Das Valvetronic System verhilft dem Fahrzeug zu einer direkteren, erhöhten Leistung und zu einem um bis zu 10 % reduzierten Verbrauch bei Ottomotoren.

Die Luftmengen-zufuhr wird bei diesem System über den variablen Ventilhub geregelt und ersetzt hier die Drosselklappenfunktionalität; die Drosselklappe entfällt deswegen aber nicht, übernimmt jedoch andere Funktionen, wie z.B. den Notlauf.

Die hochpräzisen VDO Motoren verstellen dabei stufenlos die Exzenterwelle in dem System. Über die Exzenterwelle und den von der Nockenwelle getriebenen Kipphebel werden die Einlassventile variabel verstellt. Die VDO Sensoren überwachen exakt den Verstellwinkel der Exzenterwelle und melden diesen an das Motormanagement.

Sensori VDO e motori VDO tra l'altro per il sistema Valvetronic

Il sistema Valvetronic permette alle autovetture di erogare una potenza più diretta e maggiorata, e di ridurre nel contempo fino al 10 % il consumo di carburante dei motori a ciclo Otto.

Con questo sistema l'alimentazione d'aria è regolata tramite l'alzata variabile delle valvole che in tal modo sostituisce la funzionalità della valvola a farfalla che però non viene a mancare, ma assume altre funzioni, come ad es. il regime d'emergenza.

I motori VDO ad alta precisione provvedono quindi alla regolazione continua dell'albero ad eccentrici del sistema. Le valvole d'aspirazione vengono gestite in modo variabile tramite l'albero ad eccentrici e i bilancieri azionati dall'albero a camme. I sensori VDO altamente precisi controllano esattamente l'angolo d'anticipo dell'albero ad eccentrici e trasmettono questo valore al sistema di gestione del motore.

Датчики VDO и двигатели VDO, в том числе для системы Valvetronic

Система Valvetronic способствует достижению автомобилем непосредственно повышенной мощности и снижения расхода топлива у бензиновых двигателей до 10 %.

Подача воздуха в этой системе регулируется переменным ходом клапана и заменяет здесь функцию дроссельной заслонки; но дроссельная заслонка из-за этого не отпадает, а берет на себя другие функции, например, аварийный ход.

Высокоточные двигатели VDO регулируют при этом бесступенчато кулачковый вал в системе. С помощью кулачкового вала и клапанного рычага, приводимого в действие распределительным валом, осуществляется гибкая регулировка впускных клапанов. Датчики VDO точно контролируют угол опережения заживания кулачкового вала и сообщают о нем системе управления двигателем.

Abbreviazione	Descrizione
---------------	-------------

I

TV	Valvola a farfalla
ISC	Regolatore del minimo
DLA	Attuatore lineare digitale
ACV	Valvola di regolazione aria
AFA	Servomotore delle valvole di chiusura dell'aria
EGRV	Valvola di riciclo dei gas di scarico
MVV	Comando motore a fasatura variabile
GKT	Guarnizione
ESS	Sensore dell'albero eccentrico
(+):	Per:
(-):	Non per:
n/a	n/a (non applicabile)
Hot Stamp	Marchatura connettore (stampa a caldo)
T1:	A partire dal numero motore:
T2:	Fino al numero motore:
T3:	Tipo motore:
T4	Cambio di velocità meccanico
T5	Cambio di velocità automatico
T6	Cambio automatico – 4 marce
T7	Cambio automatico – 5 marce
T8	Tiptronic
T9:	Impianto frenante/assetto dinamico della marcia:
T10	Dotazione veicolo: tempomat/limitatore velocità
T11	(+) veicoli con sensore del pedale acceleratore
T12	(+) Veicoli senza limitatore automatico della velocità (cruise control)
T13:	Limitazioni del costruttore:
T14:	Materiale del corpo iniettore:
T15:	dal numero organizzativo:
T16:	al numero organizzativo:
T17	Sistema di iniezione: SPI (iniezione centralizzata)
T18:	Per norma del costruttore sulle emissioni:
T19:	Non per norma del costruttore sulle emissioni:
T20	Per sistema a doppia combustione GNV
T21	Non per sistema a doppia combustione GNV
T22	Per gas liquido e benzina senza piombo
T23	Non per gas liquido e benzina senza piombo
T24	Riduzione tecnica delle sostanze nocive FL5
T25	Per riduzione tecnica delle sostanze nocive K e FL5
T26	Per riduzione tecnica delle sostanze nocive K
T27	Per carburatore doppio GPL
T28	Non per carburatore doppio GPL
T29	Valvola a farfalla meccanica
T30	Non per riduzione tecnica delle sostanze nocive K
T31	(+) veicoli con sensore del pedale acceleratore
T32	Per veicoli con sensore del pedale acceleratore (acceleratore elettronico)
T33:	Per n° OE:
T34	Tipo di catalizzatore: catalizzatore regolato a 3 vie
T35	Tipo di catalizzatore: per veicoli senza catalizzatore
T36:	Variante di equipaggiamento:
T37:	Numero di telaio:
T38:	Numero riduttore:
T39:	Numero di porte:
T40	Lato di montaggio – corpo valvola a farfalla
T41	Lato di montaggio – a sinistra
T42	Lato di montaggio – a destra
T43:	Soltanto in combinazione con:
T44	A scelta
T45:	Numero di poli:
T46:	Non per numero motore:
T47:	Per numero motore:
T48:	Per costruttore del corpo valvola a farfalla:
T49:	Numero di parti necessarie:
T50:	Numero organizzativo:
T51:	Diametro:
T52/T53:	Accessori:
T54	con guarnizione
T55	senza guarnizione
T56	con guarnizioni
T57	Senza guarnizioni
T58:	Materiale:
T59	Alluminio
T60	Elastomero
T61	Metallo
T62:	Colore:
T63	Verde
T64	Rosso
T65	Nero
T66	Argento
T67	Grigio
T68	Cromo/nero
T69	Oro
T70	Elettronico
T71	Meccanico
T72:	Forma:
T73	Rotonda
T74	Rettangolare
T75:	Caratteristiche chimiche:
T76	Non elastica
T77:	Progetto tecnico della guarnizione:
T78	Guarnizione in materiale soffice
T79:	Numero di viti:
T80:	Accessori raccomandati:
T81	L'indicazione dei modelli di veicolo serve unicamente a scopo di informazione generale. Il presente non è un manuale d'uso.

Сокращение	Описание
TV	дроссельная заслонка
ISC	Регулятор холостого хода
DLA	Цифровой линейный регулятор
ACV	Воздушный регулировочный клапан
AFA	Исполнительный двигатель воздушной заслонки
EGRV	Клапан рециркуляции отработавших газов
MVV	Переменное клапанное газораспределение двигателя
GKT	Уплотнение
ESS	Датчик эксцентрикового вала
(+):	Для:
(-):	Не годен для:
n/a	данных нет
Hot Stamp	Маркировка штекера (горячее тиснение)
T1:	начиная с номера двигателя:
T2:	до номера двигателя:
T3:	Тип двигателя:
T4	Ступенчатая коробка передач
T5	Автоматическая коробка передач
T6	Автоматическая коробка передач – 4-ступенчатая
T7	Автоматическая коробка передач – 5-ступенчатая
T8	Коробка передач типтроник
T9:	Оборудование для динамики торможения/ движения:
T10	Оснащение автомобиля: круиз-контроль
T11	(+) Автомобили с датчиком педали акселератора
T12	(+) Автомобили без круиз-контроля
T13:	Ограничение производителя:
T14:	Материал корпуса дросселя:
T15:	начиная с организационного номера:
T16:	до организационного номера:
T17	Система впрыска: SPI (центральный впрыск)
T18:	Для нормы токсичности ОГ изготовителя:
T19:	Не для нормы токсичности ОГ изготовителя:
T20	Для системы двойного сжигания GNV
T21	Не для системы двойного сжигания GNV
T22	Для сжиженного газа и неэтилированного бензина
T23	Не для сжиженного газа и неэтилированного бензина
T24	Система снижения уровня выбросов ОГ FL5
T25	Для системы снижения уровня выбросов ОГ K и FL5
T26	Для системы снижения уровня выбросов ОГ K
T27	Для двухкамерного карбюратора GPL
T28	Не для двухкамерного карбюратора GPL
T29	Механическая дроссельная заслонка
T30	Не для системы снижения уровня выбросов ОГ K
T31	(+) Автомобили с датчиком педали акселератора
T32	Для автомобилей с датчиком педали акселератора (электронной педалью акселератора)
T33:	Для организационного номера:
T34	Тип катализатора: регулируемый трехкомпонентный катализатор
T35	Тип катализатора: для автомобилей без катализатора
T36:	Вариант оснащения:
T37:	Номер шасси:
T38:	Номер коробки передач:
T39:	Количество дверей:
T40	Сторона установки – корпус дросселя
T41	Сторона установки – левая
T42	Сторона установки – правая
T43:	Только в сочетании с:
T44	На выбор
T45:	Количество контактов:
T46:	Не для номера двигателя:
T47:	Для номера двигателя:
T48:	Для изготовителей корпусов дроссельных заслонок:
T49:	Необходимое количество:
T50:	Организационный номер:
T51:	Диаметр:
T52/T53:	Принадлежности:
T54	с прокладкой
T55	без прокладки
T56	с прокладками
T57	Без уплотнений
T58:	Материал:
T59	Алюминий
T60	Эластомер
T61	Металл
T62:	Цвет:
T63	Зеленый
T64	Красный
T65	Черный
T66	Серебристый
T67	Серый
T68	Хромированный/черный
T69	Золотистый
T70	Электронный
T71	Механический
T72:	Форма:
T73	Круглая
T74	Прямоугольная
T75:	Химическое свойство:
T76	Не эластичный
T77:	Конструкция уплотнения:
T78	Уплотнение из текстильного материала
T79:	Количество винтов:
T80:	Рекомендованные принадлежности:
T81	Указание модели автомобиля служит только для общей информации. Это не справочник по применению.

Abréviation	Description	F
